Four members of the United Klans of America show they are ready to fight "Communism" in Livingston, Texas. They identified themselves as, left to right, John Grindle, 30, gas station owner; his younger brother, Joseph, 24, with bayonet on rifle; brother George "Rusty," 29, Houston auto mechanic, holding rifle and Bible, and their brother-in-law William "Pete" Lofton, 40, father of seven. Both Grindle and Lofton wear Confederate flag shoulder-patches and Confederate flags on their cowboy hats. The four said they had nothing against American blacks—but were willing to die fighting Communism, which they fear is trying to take over America.

Those hooded men in Texas — Who are they and why are they now showing their faces?

By Ron Laytner

HOUSTON, Texas.—They came for me at three in the morning. In a deserted parking lot behind my hotel in downtown Houston I was blindfolded and placed in the back seat of an old but high-powered car. Our driver reported over a two-way radio, "Car Five and pickup heading to meeting". Through the early morning sky came radio acknowledgements from two other vehicles on the same frequency.

I was given my instructions. I was not to talk to anyone whose photograph I was out to take. I was to obey any order given me and above all, I was not to make anyone nervous.

After some minutes the car ground to a stop. A powerful flashlight was turned on me and a City of Houston police officer removed my blindfold. Silently, he searched me in case I was concealing a tape recorder. He was the most frightening policeman I had ever seen in the United States. For across his face and over his head he wore the mask and hood of the Ku Klux Klan, the American secret terror organization that dates from the Civil War.

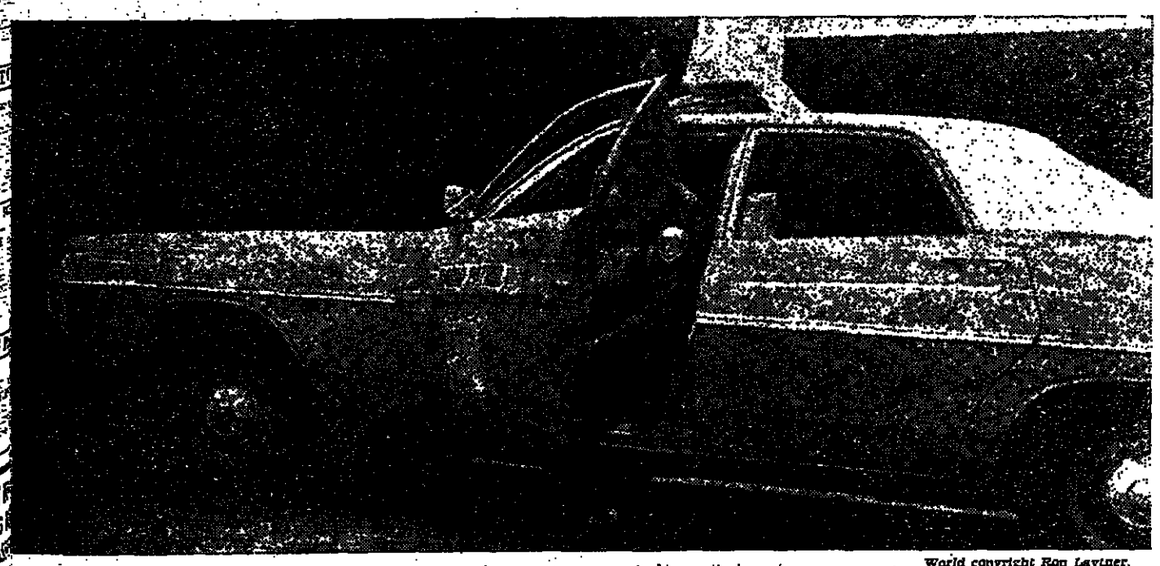

Mr. Laytner is a Canadian photo-journalist whose work has appeared in several U.S. newspapers and the world's leading magazines, among them West Germany's Der Stern, Italy's Epoca, France's Paris Match, and the now-defunct Life. He has just returned to his base in England after completing this photographic report and article on the Ku Klux Klan in Texas.

Not only had the policeman hidden his face but the number on his police badge was covered with masking tape and so were the identifying numbers on his City of Houston police radio car. Within minutes he was joined by an anonymous member of the Galveston, Texas, Sheriff's Department, also a member of the Klan.

We were in the driveway of a gas station closed for the night somewhere in Houston and as I quickly and nervously took my photographs, the only sound to be heard was the clicking of the camera and the voice of the Houston police coming over the radio in the police car.

This pre-dawn meeting with the masked policemen was the highlight for me of two weeks of night-riding with the Texas Ku Klux Klan. And it was the modern day Klan's way of showing me the power of the secret terrorist organization. And, for me, it proved conclusively what black people have been crying out for years—that the Ku Klux Klan has Klansmen who are members of

(Continued on Page 3, Col. 1)

World copyright Ron Laytner.

This photo was taken in the pre-dawn quiet of Houston, Texas. It shows a City of Houston police officer who is a member of the Klan wearing the mask and hood of the secret organization. His shoulder badge is covered and so are identifying marks on his Houston police radio patrol car. The policeman first searched the photographer for a tape recorder or transmitter in case the cameraman was working with the FBI. During the photographing the policeman was silent lest his voice could be identified by the photographer. For years black people in America have been accusing Southern U.S. police forces of allowing themselves to be infiltrated by members of the Ku Klux Klan. This has always been denied by police officials.

Sentence For Calley Is Upheld

Appeal Planned To Higher Court

By John W. Finney

WASHINGTON, Feb. 16 (NYT).—The Army Court of Military Review today upheld the murder conviction of 1st Lt. William L. Calley jr. for his role in the My Lai killings and approved his sentence of 30 years' confinement at hard labor.

In announcing the decision, the Army said the review court found that Lt. Calley "personally participated in, and ordered subordinates to participate in, the mass summary execution of unarmed, unresisting men, women and children in the hamlet of My Lai, Republic of Vietnam, on March 16, 1968."

The three-man court, which functions somewhat like an appellate court, also denied Lt. Calley's petition for a new trial, thus presumably bringing to a close the Army's legal proceedings against the key figure in what has come to be known as "the My Lai Massacre."

Review by Nixon

The Calley case, however, could still be appealed to the U.S. Court of Military Appeals, a civilian court that serves as the supreme court in military legal proceedings. Alternatively, there is a possibility that the case could go directly to President Nixon, who has announced that he would personally review and decide the Calley case.

Lt. Calley's lawyers announced they would appeal to the higher court.

Lt. Calley, a platoon leader with the Americal Division, was convicted by a court-martial in April, 1971, of the premeditated murder of at least 22 Vietnamese civilians in the My Lai village. Of the more than 24 officers and men implicated by the Army in the event—in which up to 400 South Vietnamese civilians were reportedly slain—only Lt. Calley was convicted of criminal charges.

Lt. Calley originally was sentenced by the court-martial to life imprisonment, but the sentence subsequently was reduced by the commander of the Third Army at Fort Benning, Ga., to 20 years' imprisonment at hard labor. Pending the outcome of his appeals, Lt. Calley has been confined under guard to an apartment at Fort Benning.

In upholding the court martial conviction, the Court of Military Review, according to the Army announcement, found that "Lt. Calley's unit entered My Lai in the expectation of encountering enemy forces; however, their operation was unresisted.

"Despite the absence of any combat in the area, Lt. Calley caused villagers to be herded together and killed."

'Only Obeying Orders'

The Army announcement said that the review court had rejected Lt. Calley's basic argument on appeal that "he did not intend to commit murder and that he was only obeying orders."

Also rejected, according to the announcement, were other "more technical claims" that he was not subject to military jurisdiction, that the court-martial was improperly constituted, unlawfully controlled by military superiors and influenced by pre-trial publicity and that his case was prejudiced by the refusal of a House armed services subcommittee to release testimony it received in executive session.

The review court was composed of three military judges: Col. William C. Vinet jr., Col. James D. Clause and Lt. Col. Wayne G. Alley.

Fatah Attempt At Jordan Coup Reported Foiled

BEIRUT, Feb. 16 (UPI).—Lebanese newspapers reported today that Jordanian officials had foiled a spectacular Palestinian guerrilla plot to seize government buildings and ministers in Amman while King Hussein was visiting the United States.

But a spokesman for the el-Fatah guerrilla organization told a news conference in Beirut tonight that the reports were not correct.

"These reports are a clear Jordanian attempt to commit further acts of liquidation against the Palestinian people," a spokesman, Kamal Adwan, said. He said a Jordanian Interior Ministry statement that Palestinian guerrillas have been arrested in Amman was correct.

'Organize Activity'

But he said the arrested guerrillas were merely passing through Jordan "to organize guerrilla activity and our people in the Israeli-occupied territory."

[King Hussein staying at a private villa in Palm Beach, Fla., was unavailable for comment today, AP reported. Responding to newsmen's questions this morning, Marwen S. Kasim, the first secretary of the Jordanian Embassy in Washington, who is traveling with King Hussein, said he was not aware of the reports from Beirut. "This is ridiculous," he said. "I'm not informed of it." He said he would have been told of any developments.]

"Those arrested were picked up through close collaboration between Jordanian and Israeli intelligence officers," the el-Fatah spokesman said.

He said his organization had been sending guerrillas across Jordan into Israeli-occupied territory "because we were convinced the Arab countries were planning no action against the occupation and on behalf of the Palestinian cause."

Mr. Adwan said Palestinian leaders in Lebanon met Arab ambassadors today to explain the "real version" of the arrests in Amman. The number arrested was not announced in Amman, but unofficial reports put it at 16.

Mr. Adwan also said all those arrested were members of el-Fatah and not of the Black September organization as the report in the Beirut newspaper An Nahar claimed.

Newspaper Report

The independent newspaper An Nahar said the guerrillas planned to seize Premier Ahmad Lawzi and his ministers tomorrow as they attended a weekly cabinet meeting. They also planned to occupy the premier's office and radio and television buildings.

The guerrillas then planned to demand the release of hundreds of guerrillas held in Jordanian jails, An Nahar said.

Beirut's pro-commando Al Yom said the aim of the plotters was to overthrow Jordan's regime and assassinate King Hussein on his return from the United States, which is expected next week.

Amman Reports Arrests

AMMAN, Feb. 16 (AP).—Undisclosed numbers of "saboteurs" were arrested yesterday while crossing the border from Syria into Jordan, the government announced.

They were carrying arms and documents related to planned subversive action within Jordan, the announcement added. No further details were given.

Dayan Urges More Settlers On Arab Land

Replies to Proposal Of Israeli Pullout

TEL AVIV, Feb. 16 (UPI).—Defense Minister Moshe Dayan said today that Israel must "increase the pace and expand the map" of Jewish settlement in occupied Arab land until Middle East peace efforts pay off.

"Peace with the Arab nations, even by stages, is our foremost objective today," Gen. Dayan told the Tel Aviv Bar Association, "and we must listen to and examine relentlessly the Arab readiness for it.

"But we must take into account [the fact] that the long-hoped day may be late in coming. Therefore, we should not fall into a situation where we shall lose our breath, succumb to pressure and be forced to accept terms of a peace [settlement] that we could not put up with," he added.

Not Intolerable

"We must conduct our activity in the [occupied Arab] territories and our defense policy and our self-discipline in such a way that even a state of neither war nor peace would not become intolerable for us.

"We must increase the pace and expand the map of settlement in the territories," he said.

Gen. Dayan's statement was made in response to remarks by Yitzhak Ben Aharon, the secretary-general of the Israel Labor Federation, who had suggested that Israel make a unilateral withdrawal from sections of the Jordanian West Bank before a formal settlement with Jordan is reached.

A poll carried by the newspaper Yeidoth Aharonoth showed that only 1.4 percent of the respondants favored such a move. The majority of the 1,000 Israelis polled—71 percent—favored a silent annexation of occupied Arab land through the erection of more Jewish settlements there.

45 Settlements

So far, 45 settlements have been set up in territories captured from the Arabs in the 1967 Middle East War. Most had their beginnings in paramilitary villages.

Meanwhile, eight residents of Mizraat el-Kabbaliya, an Arab village north of Jerusalem, on the West Bank, have been seized as suspected members of the Popular Front for the Liberation of Palestine, a military spokesman said today.

Egypt Silent on Rogers

CAIRO, Feb. 16 (Reuters).—Egypt maintained an official silence today on the statement by Secretary of State William P. Rogers that the United States would try to get Middle East peace talks started between Israel and the Arab nations.

The Egyptian press gave Mr. Rogers's statement only brief coverage.

In Ending Wide Trade Deficit

Full Impact of Devaluation Takes 2 Years, U.S. Aide Says

NEW YORK, Feb. 16 (Reuters).—Treasury Under Secretary Paul A. Volcker said today it will take "more than two years" for the full effects of the recent devaluation to show up in the U.S. trade balance.

Mr. Volcker told reporters that there was "no possibility" that the United States would be able to bring the trade balance into equilibrium in 1973. He conceded it was possible the short-term effects of devaluation could be negative.

"An exchange rate action almost inevitably has a perverse impact in the short run," he said. He added that this has occurred because trade patterns for the short run are already fixed. Therefore, he said, it is possible "we will go backward before we go forward."

He said the devaluation occurred when the U.S. trade pattern should have been improving anyway.

"The question was whether it was going to improve enough."

Denies Pressure

Mr. Volcker denied that the United States ever brought any pressure on Germany or France to permit their currencies to float.

"We did not try to persuade them to float," he said.

Mr. Volcker declined to comment on how much of a devaluation in the dollar the United States wished to see in relation to the currently floating yen.

He said devaluation "doesn't answer all the problems but gives an important positive thrust" to adjusting our payments situation and that of the rest of the world.

"So far as exchange rates are concerned, I want to express full satisfaction with what has been accomplished."

He said devaluation helped to lay the basis for a more constructive reform of the international monetary system.

When asked what could be done to control capital movements by multinational banks and corporations, Mr. Volcker said the current discussions by the Committee of Twenty probably will arrive at "a series of partial answers, which, when taken together, will help resolve the problem."

Some of the answers include a greater degree of flexibility in exchange rates, wider currency parity bands and better equilibrium in general in the economies of nations.

Mr. Volcker added, when asked about a general float of all currencies, "We are not going to have that kind of system."

He also said that where there are barriers that cannot be dealt with by liberalization of trade patterns "we will have to protect our own position."

Sir Christopher Sees Nixon

WASHINGTON, Feb. 16 (Reuters).—Sir Christopher Soames, the European Economic Community's representative for foreign relations, today had a 45-minute meeting with President Nixon.

Sir Christopher, former British ambassador in Paris, is having his first discussions with U.S. officials since being appointed a vice-president of the EEC Commission, with special responsibility for foreign relations.

An EEC spokesman said today that U.S. officials have been sounding out Sir Christopher on future European trade policies.

Italian Train Robbed

TURIN, Feb. 16 (Reuters).—Masked bandits armed with machine guns and pistols held up a passenger train on a local line near here today and robbed it of 15 mail bags and about 20 parcels, police said. They said that some of the mail bags and parcels contained money but were unable to say immediately how much.

Fund Cutoff Directed Where Necessary

Judge Orders U.S. to Act Against Still-Segregated Schools

ASHINGTON, Feb. 16 (AP). federal judge today ordered Nixon administration to begin orcement proceedings within days against hundreds of al-dly still segregated schools colleges.

he government is expected to eal the decision.

S. District Judge John H. tt laid down a strict time-le for the Department of lth, Education and Welfare to in enforcement hearings and off funds where appropriate.

he time has long since passed, Judge wrote, for the action ed for by the 1964 Civil Rights

HEW was ordered to begin enforcement proceedings within 60 days against:

- Seventy-four elementary and secondary-school districts which allegedly reneged on earlier desegregation plans.
- One hundred twenty-seven districts in "presumptive violation" of the Supreme Court's 1969 Alexander decision, requiring desegregation "at once," or the 1971 Swann decision, presuming violation among schools "that are substantially disproportionate in their racial composition."

Progress Reports

The government was told to submit a progress report within 150 days and further reports every six months for three years "to permit evaluation of the reasons for any delays."

Within 120 days, the judge said, HEW also must begin enforcement proceedings against allegedly segregated public colleges in 10 states which, HEW said, were in violation in 1969.

Louisiana, Mississippi, Oklahoma, North Carolina and Florida were listed as never having submitted desegregation plans.

Arkansas, Georgia, Pennsylvania, Maryland and Virginia submitted unacceptable plans and never were asked to amend those plans, the judge said.

HEW also was ordered to "implement without unreasonable delay" a desegregation enforcement program for vocational schools and schools for the deaf, blind and mentally retarded in 17 Southern and border states.

Although HEW does not have a complete list, the judge noted, at least 235 such schools have been identified.

In Louisiana, he said, seven state-administered vocational schools are "overwhelmingly black and 25 schools are overwhelmingly white."

In addition, the judge said, HEW must monitor "to the extent that their resources permit" desegregation progress at 640 school districts under court order in the 17 states.

Primary responsibility rests with the courts that issued the orders, he said.

Proselytism, Conversions Resented

Israel May Banish Christian Missionaries

JERUSALEM, Feb. 16 (UPI).—Israel may take steps to banish Christian missionaries from the Holy Land for trying—and sometimes succeeding—to lure Israelis away from Judaism, a government official said today.

According to groups backing a proposal to oust the missionaries, between 5,000 and 6,000 Israelis a year have been converted to Christianity by missionaries since the 1967 Middle East war.

The government official said that Premier Golda Meir's cabinet will discuss the status of the estimated 1,000 missionaries in Israel, including their possible banishment, at its regular meeting Sunday.

"We don't take to missionaries and proselytizing," the official said. "We have to be rid of this problem somehow."

An Interior Ministry spokesman said that approximately 10 missionaries were expelled last year, while others left "after we gave them hints that they are not welcome."

In the last week, there have been three attacks against missionaries—arson attempts against the Mount of Olives Bible Center and the Mount Zion Press plus an explosion at the home of the local leader of "Jews for Jesus."

The leader, Shira Lindsay, formerly of Dallas, denied trying to convert Israelis. She said that she and her group are "just Jews who found Jesus and the teachings of the Gospel and have come to Israel because of this belief."

Eight members of the militant Jewish Defense League were arrested in the arson attempts. But the JDL leader, Rabbi Meir Kahane, denied that they were responsible, even though his group opposes missionaries.

Rabbi Kahane staged a one-day hunger strike yesterday at the Wailing Wall, Judaism's holiest shrine, to protest missionary activity. Unless the government does something, he said, "there will be violence."

"I don't like soul snatching," Rabbi Kahane told newsmen. "If you lose a Jew in Auschwitz or through conversion, it's still a soul lost to our people."

Mine Kills 5 Zambians As UN Team Arrives

LUSAKA, Zambia, Feb. 16 (AP).—Three women and two children were seriously injured in a land-mine explosion at Chirundu 20 minutes before a special UN Security Council mission on the Zambia-Rhodesia border situation arrived in the area yesterday.

President Kenneth Kaunda later met the mission at State House and showed them two Zambians who allegedly had confessed to helping Rhodesian security forces plant mines along the Zambia-Rhodesia border.

Five Crewmen Wounded

U.S. Copter on Truce Flight Downed Over Disputed Area

SAIGON, Feb. 16 (Reuters).—A U.S. Army helicopter was shot down 50 miles north of Saigon today as Communist and government forces traded accusations of cease-fire violations and the prisoner-of-war exchanges faced the threat of grinding to a halt.

The Chinook helicopter was hit by machine-gun fire while flying over a contested area. Five American crewmen were wounded when it crashed. One of the crewmen was later reported to be in critical condition.

An American spokesman said the helicopter, which carried U.S. Army markings, was on a mission for the Joint Military Commission of the United States, North and South Vietnam and the Provisional Revolutionary Government when it was fired upon.

The United States made a strong protest to the Communist side today over the shooting down of the helicopter.

Meanwhile, the Saigon government released 500 more Communist POWs today, bringing to 3,614 the number freed since the prisoner exchange began Monday. A spokesman said, 200 more were due to be released before nightfall.

He said this would be the last batch unless the JMC subcommission on prisoner exchanges reached "some sort of agreement" at a meeting tonight.

The spokesman earlier had said that the government would stop releasing Communist prisoners after today if the Viet Cong did not live up to their promise to set free 1,020 South Vietnamese soldiers in the first week of the POW exchange.

The Viet Cong, so far, has released only 711 prisoners.

In other developments, the Saigon High Command charged that the Communists violated the cease-fire 179 times in a 24-hour period up to noon today. They lost 155 men killed against seven South Vietnamese soldiers killed and 48 wounded, the command said.

A command spokesman said the biggest ground action occurred six miles west of the Central Highland city of Kontum, when an unknown number of Communists shelled and attacked South Vietnamese positions in the area.

He said the Communists were repulsed, losing 60 killed. Government casualties were unknown.

Cambodian Fighting

PHNOM PENH, Feb. 16 (AP).—Seven Cambodians were killed and 30 wounded today in heavy fighting along the Phnom Penh-Saigon highway, a field report said.

In an attempt to dislodge Vietnamese and Cambodian guerrilla forces, the government airlifted paratroops to Highway 1 behind Communist lines, 14 miles from the capital.

More troops were airlifted into the embattled Mekong River town of Banam.

Thai Troops Pull Out

BANGKOK, Feb. 16 (Reuters).—Thailand has withdrawn its last 38 military personnel from South Vietnam, Radio Thailand said today.

A government announcement broadcast by the radio said no military personnel would be sent to South Vietnam to assist South Vietnamese military efforts in the future.

Thailand first sent combat troops to South Vietnam six years ago. In 1970, it had more than 10,000 troops serving in the country.

Army Studies Allegations Against PWs

WASHINGTON, Feb. 16 (AP).—A Pentagon spokesman said yesterday the Army is reviewing AWOL and assault allegations pending against three enlisted men recently released from captivity in South Vietnam.

"I understand that two of them were carried as AWOL at the time they were captured and one of them was under charges of assault," Maj. Gen. Daniel James told a briefing.

"These charges are being reviewed [as well as] the facts and circumstances surrounding the charges, and the Army, after it completes its investigation, will see that they get what's coming to them."

A Pentagon spokesman said later that what Gen. James meant was that, after the Army clarifies the status of the three men, they will receive any back pay and allowances to which they are entitled.

Disciplinary Action

Defense Department officials said that Spec. 4 Keith A. Albert of Thibodaux, La., "was on duty with his unit at the time of capture, but his records had been flagged because of possible disciplinary action as the result of an alleged assault."

Officials said they could provide no further details at this time.

They said that Spec.4 Richard H. Springman of Long Beach, Calif., and Pvt. Ferdinand A. Rodriguez of Brooklyn, N.Y., were believed to be absent without authority at the time they became POWs.

All three men were among 19 U.S. servicemen freed by the Viet Cong in South Vietnam Monday.

The officials also said that the Pentagon has no plans at present to bring charges against returning POWs for things they may have said or done during captivity in Vietnam.

However, they left open the possibility that charges could be brought by individual servicemen against fellow prisoners who, they consider, might have shown disloyalty or collaborated with their captors.

Some of the returning POWs are alleged to have made statements critical of America's role in Indochina.

Associated Press.

WELCOME BACK—Chinese Premier Chou En-lai greeting presidential adviser Henry Kissinger in Peking Thursday.

After He Visits Handicraft Show

Kissinger, Chinese Leaders Meet 4 Hours in 2d-Day Talks

WASHINGTON, Feb. 16 (AP).—Presidential adviser Henry A. Kissinger spent four hours in conference with Chinese leaders today, the second day of his visit to Peking.

The White House made the announcement regarding the talks between Mr. Kissinger and Chinese Premier Chou En-lai, Foreign Minister Chi Peng-fei and Chiao Kuan-hua, Mr. Chi's deputy.

Meanwhile, there were meetings involving Alfred Jenkins, a State Department specialist on Asia, Assistant Foreign Minister Chang Wen-chin and others from both sides.

The Kissinger-Chou session ran from 2 to 6 p.m. today and constituted the second round of talks since Mr. Kissinger arrived in Peking yesterday.

White House Press Secretary Ronald L. Ziegler, asked about the atmosphere of the talks, said that he had received no report on that from Mr. Kissinger.

Shortly after he arrived in Peking from a rest stop in Hong Kong, Mr. Kissinger had a 3 1/2-hour meeting with Mr. Chou yesterday.

A Bit of Relaxation

PEKING, Feb. 16 (Reuters).—Mr. Kissinger, who complained after his four previous visits here that he had seen little of China, took time off this morning to visit an exhibition of handicrafts by China's minority peoples.

Tonight, the American party was being entertained by Mr. Chou and other Chinese leaders at a dinner in the Great Hall of the People.

A relaxed atmosphere seems to be the keynote for the visit so far, but diplomats believe that before it ends on Monday the two men will review the spectrum of world problems.

Mr. Kissinger may have come with an offer from President Nixon to reduce the American presence in Taiwan by as much as 6,000 men, according to reports from the United States.

The expansion of Soviet influence in Asia, the issue of the American presence in South Korea and the possibility of some U.S. representation in Peking later this year also may have been discussed, observers said.

Reds Say They'll Free 20 GIs In Hanoi Saturday or Sunday

SAIGON, Feb. 16 (AP).—The chief spokesman for the North Vietnamese delegation said today that 20 American prisoners of war will be released in Hanoi tomorrow or Sunday.

Asked specifically when the U.S. POWs would be freed, Bui Tin said, "Perhaps tomorrow, and if not, the day after."

Mr. Tin said there are still some technical problems to be worked out. He did not specify what they are, but they did not appear to be major problems.

A subcommission of the Four-Party Joint Military Commission met today to work on the problems. The commission includes representatives of the United States, North and South Vietnam and the Viet Cong.

North Vietnam had announced earlier this week that it would free 20 additional American prisoners of war in advance of the next regularly scheduled increment as a reciprocation of goodwill for the visit of U.S. presidential adviser Henry A. Kissinger to Hanoi.

A total of 143 American prisoners of war was released in the first group in both North and South Vietnam Monday. The release of 20 more will leave 430 American prisoners still held by the Communist side in North and South Vietnam and Laos.

Meanwhile, a scheduled meeting this morning of the chiefs of the delegations was canceled when the senior representatives of the U.S. and South Vietnamese sides did not show up.

A U.S. spokesman said the senior American representative, Maj. Gen. Gilbert H. Woodward, was indisposed but his illness was not serious. The spokesman said the deputy, Brig. Gen. John A. Wickham jr. went in Gen. Woodward's place with full authority to act on any matters.

There was no explanation from the South Vietnamese side of the absence of their senior representative, Lt. Gen. Du Quoc Dong.

In the absence of Gen. Dong, South Vietnam was represented by Brig. Gen. Pham Hoa Hiep.

The deputy chiefs of the four sides met at 11 a.m.

Mr. Tin said that Lt. Gen. Tran Van Tra, the chief Viet Cong delegate, protested the absence of the senior American and South Vietnamese representatives.

Mr. Tin said Gen. Tra protested that the absence of the chief U.S. and South Vietnamese delegates was calculated in advance to lower the level of the conference and interferes seriously with the normal work of the military peace-keeping commission.

Mr. Tin reported that the senior North Vietnamese representative, Maj. Gen. Le Quang Hoa, also "protested against the other side for their bad faith."

60 More POWs Back

TRAVIS AIR FORCE BASE, Calif., Feb. 16 (AP).—The red carpet was rolled out again here today as more liberated American war prisoners reached home. Among them was Navy Lt. Comdr. Everett Alvarez jr., the first American pilot shot down and captured in North Vietnam.

Comdr. Alvarez, who was released to American forces last Sunday after eight years and six months—nearly a quarter of his life—in Communist prisons, was on the second plane to arrive here.

Hundreds of well-wishers greeted the men.

Comdr. Alvarez was a 26-year-old lieutenant when he left his pretty 24-year-old bride of two months in the spring of 1964 for a tour of duty on the aircraft carrier Constellation.

He returns to his mother and sister as a 35-year-old lieutenant commander. His wife, Tangee, waited six years. In 1970, she went to Mexico and obtained a divorce.

No Progress Seen At Cease-Fire Parleys in Laos

VIENTIANE, Laos, Feb. 16 (NYT).—Despite meetings lasting most of the day between government and Pathet Lao negotiators and a special cabinet meeting, no progress was reported today in reaching a cease-fire agreement on Laos.

Long meetings were held between the Pathet Lao chief negotiator, Phoumi Vongvichit, and the Vientiane interior minister, Pheng Phongsavan, but informants from the two sides said that some "rather important" problems remained.

This morning, the Laotian premier, Prince Souvanna Phouma, called his cabinet together for a special meeting, mainly to inform the ministers of developments in the negotiations.

The negotiators were taking the evening off to attend a dinner by British Ambassador John Lloyd in honor of a delegation of British Labor party leaders who will be going on to Hanoi tomorrow morning.

To Press Nixon for Amnesty

U.S. Deserters, Draft-Evaders Plan 2-Day Meeting in Paris

PARIS, Feb. 16 (UPI).—Draft-dodgers and deserters from America's Vietnam-war mobilization will meet Monday to demand amnesty from President Nixon, spokesmen said today.

George Carrano, who fled to Sweden after receiving a draft notice in 1968, said: "We will be speaking for one million resisters who have been penalized in some way.

"This is contrary to Nixon's attempt to delude himself and the American people that there are only a few hundred."

Mr. Carrano will be among the war resisters from Sweden, Canada and England and from U.S. anti-war groups who will attend the "International Conference of Exiles" Monday and Tuesday.

Mr. Carrano said: "We see this confrence as our opportunity to get it across to the U.S. people that we are not criminals."

Other conference organizers said that "it is cynical to blame America's 300,000 Vietnam casualties on those who, for political or moral reasons, refused any participation or continued participation in the war."

A New York-based committee, Safe Return, and two American exile organizations have set up the conference for thousands of anti-war Americans living abroad.

Michael Uhl, a member of Safe Return who is a Vietnam war veteran, said that the meeting was being held in Paris because "The only place that exiles can meet is in exile."

Mr. Uhl said that his group demanded "universal, unconditional amnesty" which would *rehabilitate* the 550,000 military men given less-than-honorable discharges since 1963.

Rand Aide Admits Long Lapse In Guarding Pentagon Papers

By Martin Arnold

LOS ANGELES, Feb. 16 (NYT).—The Rand Corp. conceded yesterday that the Pentagon papers were in its hands for 16 months before anyone thought to enter them into the corporation's top-secret control system.

And this only happened after Daniel Ellsberg, one of the defendants in the Pentagon papers trial, walked across the hall from his office at Rand Corp. and dropped them on the desk of a fellow employee, Richard H. Moorsteen. Mr. Moorsteen testified late yesterday afternoon.

Mr. Moorsteen, a prosecution witness, is a former Rand consultant and now a San Diego manufacturer. He testified on direct examination that Mr. Ellsberg put the papers on his desk on May 20, 1970, and that he took one quick look at them and called the Rand president.

Within the hour, he testified, "the Rand top-secret control officer came with a little cart and picked them up" and gave him a receipt.

Earlier, Richard H. Best, Rand's chief of security, said under cross-examination that the failure to put the papers into the control system for so many months was unusual and that he had no explanation for it.

The Rand Corp. is a private research organization working mostly for the Defense Department.

The copy of the Pentagon papers involved in this trial arrived at Rand's Washington office on Jan. 21, 1969. On March 3, 1969, Mr. Ellsberg transferred 10 volumes of the 47-volume papers to Rand's headquarters in Santa Monica, Calif., and on Aug. 28, 1969, he transferred eight more volumes. Both transfers were approved.

None of these were given to Rand's top-secret control officer until Mr. Moorsteen saw them on May 20, 1970, and the control officer, Jan Butler, did not officially log them into the system until Dec. 31, 1970, although she did keep them in her safe between May and December.

Merely for Storage

The defense contends that this copy of the "top-secret-sensitive" papers was sent to Rand merely for storage as the private papers of three Defense Department officials and that those officials gave Mr. Ellsberg access to them and veto control at Rand over who could use them. Further, the defense says that the government did not own this copy of the papers.

The government, on the other hand, contends that, because they were classified documents, while they were at Rand they were protected by the "industrial security" manual and the Rand security manual.

The "industrial security" manual is, the prosecution said, attached to each contract between Rand and the government, and, although no such contract ever involved the Pentagon papers, the government insists that its other contracts with Rand were broad enough to include these papers.

Jury to Decide

Judge William Matthew Byrne jr., who is presiding at the trial, has ruled that this is an issue for the jury to decide.

Mr. Ellsberg and Anthony J. Russo jr. are accused of eight counts of espionage, six counts of theft and one count of conspiracy in the case.

Anti-Hijack Pact By Canada, Cuba

OTTAWA, Feb. 16 (UPI).—Canada and Cuba formally signed a bilateral treaty on air and sea piracy yesterday. External Affairs Minister Mitchell Sharp said that the accord would strengthen ties between the two nations.

Mr. Sharp and Cuban First Vice-Foreign Minister Rene Anillo signed the agreement, which took 2 1/2 years to negotiate. It replaces a treaty negotiated for Canada by Britain in 1904.

The new agreement, the first between the two nations since the 1959 Cuban revolution, provides for either the prosecution or extradition of a hijacker by the nation in which he seeks sanctuary.

The United States and Cuba signed a similar agreement yesterday.

531 U.S. Airports Post 4,500 Men To Bar Hijacks

WASHINGTON, Feb. 16 (UPI).—Faced with $1,000-a-day fines if they don't comply with a government order, 531 airports around the nation today posted about 4,500 armed guards at boarding gates to thwart hijackers.

The court battle over the armed-guard program ended yesterday. But a three-judge panel of the U.S. District Court of Appeals told the Federal Aviation Administration not to fine any airport that attempted "in good faith" to meet the armed-guard requirement.

The agency also was required to hold hearings on complaints from airport operators about inability to provide the guards. The court also ordered the government to continue the use of federal security police at airports unable to provide a full complement of guards at all boarding gates.

The security program is a major undertaking. The nation's airlines average 15,000 flights a day and carry about 500,000 passengers in a fleet of 2,200 airliners.

Student Runs at Heath

BIRMINGHAM, England, Feb. 16 (AP).—A British student, clutching a copy of the "Little Red Book" of Mao Tse-tung, rushed at Prime Minister Edward Heath with fists upraised today, while 500 other students chanted: "Heath, out! Heath, out!" Security officers quickly collared the student and Mr. Heath walked into Birmingham University's Institute of Art for a talk with student leaders.

Girl, 19, Is Jailed 6 Years in N.Y. On Rape Charges

NEW YORK, Feb. 16 (NYT).—A 19-year-old girl, who is believed to be the first woman ever convicted of rape in New York State—and possibly in the country—was sentenced to six years in prison yesterday by Supreme Court Justice James Leff.

The girl's male companion was sentenced to 25 years.

The two were convicted on Jan. 17 of holding two 20-year-old girls captive in a Greenwich Village apartment for nine hours and forcing them to perform sexual acts and take LSD.

Erma Mitchell of Newport News, Va., and Robert Byrd, 28, were specifically found guilty of two counts each of both rape and sodomy in the first degree and numerous counts of robbery, assault, coercion and unlawful imprisonment.

The rape charge against Miss Mitchell stems from her role as an accomplice in the nine-hour episode that began late on the afternoon of July 2, 1972, when she met the two girls and invited them back to her apartment.

It ended early the next morning when one victim managed to escape from the apartment and ran naked, screaming for help, down the street. About an hour later, she returned to the apartment with the police and Miss Mitchell and Byrd were taken into custody.

One Millionaire Sues Another —For $78

HOUSTON, Feb. 16 (UPI).—Millionaire Stanley T. Thomas sued millionaire O.H. Coffield yesterday for $78.24.

Mr. Thomas said that he damaged his three-year-old car in a hole on Mr. Coffield's land on Sept. 3. Mr. Coffield refused to pay for repairs, saying he was not responsible.

Both men have large real-estate holdings.

The suit was scheduled for trial in Small Claims Court.

U.K. Labor Unrest Spreads; 1-Day Rail Strike Set Feb. 28

LONDON, Feb. 16 (Reuters).—Train engineers and hospital workers today joined a mounting protest over Britain's official pay policies.

As a nationwide strike by 47,000 gas workers entered its third day, a big rail union called a one-day strike for Feb. 28 and leaders of 220,000 hospital workers announced protest actions to start on March 1.

Civil servants, teachers and Ford Motor workers have threatened similar campaigns, all within a three-day period from Feb. 27 to March 1.

The growing threat to Prime Minister Edward Heath's economic policy pushed government and unions nearer the brink in a nerve-testing struggle that has led to speculation over early elections.

Some commentators spoke of a possible breakdown in democratic structures if no compromise emerged.

Others saw the unions balanced precariously between grass-roots militancy and reluctance to face a government-union showdown which miners' leader Joe Gormley said would be "damned suicide."

All passenger trains are likely to stop running in the Feb. 28 shutdown. In addition, the engineers will start a policy of "noncooperation" which is expected to bring slow paralysis to the railways over the next few days. The London Underground is likely to be affected on strike day.

The action by hospital workers will include selective strikes, overtime bans, withdrawal of cooperation and other moves.

Union leaders said the program of disruption would affect the whole of Britain's National Health Service and might force some hospitals to close.

In another development today, unions and management ended three hours of talks without removing the threat of a March 1 strike at the 21 British plants of the Ford motor company.

Company negotiators offered improvements in pension benefits but stuck by a wage offer of £2.40 for 52,000 workers in line with government guidelines. The union said this was unacceptable.

All current protests are linked with the government's pay freeze and the statutory prices and incomes policy to follow.

On Feb. 27, one day before the trains stop running, 250,000 civil servants from three unions will stage a one-day strike and 2,900 teachers in 210 London schools will start the second stage of protest action. They will begin the first stage Tuesday.

Ulster Rivals Assail Court's Death Penalty

For Protestant Who Killed a Policeman

BELFAST, Feb. 16 (AP).—A Protestant militant will appe the sentence he received yesterd for killing a policeman, his leg advisers said today, as the hang ing order aroused widespre criticism.

Both Catholics and Protestan denounced the penalty as barbar and urged that Northern Irelar be made to conform with the re of Britain, where capital punis ment has been abolished sin 1969. The death penalty has be in force in Northern Ireland sin 1966 for the killing of policeme

Albert Browne, 30, a televisio engineer, was sentenced yesterd for the murder last October Constable F. Gordon Harrin, 3 Immediately after the hearin Browne was taken to the co demned cell of Belfast's Crum Road Prison.

About 20 women took part a quiet demonstration in suppo of Browne outside the jail toda The condemned man's wife, t mother of two children, visit him last night.

25-Year Sentence

At home today, she told new men: "If we are lucky enough get the sentence commuted I still have to wait 25 years." I addition to the death senten Browne got 25 years for attemp ing to shoot another policeman

A plea for clemency—if t appeal fails—normally would sent to Queen Elizabeth by t Northern Ireland administrati of British Secretary of Sta William Whitelaw.

Nobody has been executed Northern Ireland in 13 years. D spite the deaths of 35 policem since the present troubles begi in 1969—plus the killing of 1 British soldiers— Browne is on the fourth man in that time face a capital charge.

A soldier was shot in the ba today by a guerrilla sniper the Catholic Falls Road area Belfast. Army headquarters sa that the soldier underwent eme gency surgery but remained in "very serious" condition.

In Armagh, British troo evacuated 300 children from S Brigid's primary school and 1 persons from a housing proje while explosives experts san bagged and detonated a bo planted in a nearby facto complex. No one was hurt the blast.

Man Dies in Beirut Fire

BEIRUT, Feb. 16 (Reuters) One man died from suffocation a fire on the 25th floor of Be rut's tallest building today. A least six others were injured, fir brigade sources said. A helicopte evacuated about 12 workers trap ped in the half-finished buildin the St. Charles Center.

French Communists Warn Allies on Election Program

PARIS, Feb. 16 (UPI).—The Socialist-Communist alliance showed some cracks today after a public warning by the Communist party that the Socialists were wavering on their joint election program.

Relations between the two leftist parties soured after Georges Marchais, Communist party secretary-general, declared at a news conference yesterday that his party alone, and not the Socialists, guaranteed eventual application of the election program.

Socialist party officials said that party leader François Mitterrand would soon reply to the Communist statement.

"On the basis of past experience, we are the sole guarantors for the execution of the common program," Mr. Marchais said. His barb, directed at the Socialists, was accompanied by a warning that the Communists would not allow the Socialists to interpret in their own way their common program.

Road to Socialism

The program, adopted by the two parties in June, promises to launch France on the road to a socialist society if the two parties win the March 4-11 National Assembly election. The Gaullists, who are trailing in the public opinion polls, are combating the Socialist-Communist platform as containing costly welfare and nationalization projects that would ruin France's economy.

Mr. Marchais issued his warning to the Socialists and charged that the Gaullists were trying to split the Socialists away from the Communists by dangling before them the prospects of political cooperation.

The newspaper Combat said today that the Communist leader, by attacking both President Georges Pompidou and the Socialist party, aims at "placing both in a state of subordination" to the Communist party.

Clear Warning

The newspaper France-Soir said: "Thus, Mr. Mitterrand and the Socialists have received a clear warning, if they needed it. The Communist party, referring itself to the pledges it has received, will not accept a repetition of what has happened to it in 1947 and 1956, in other words a change about in the S cialists' attitude to its detrimen

The newspaper Aurore said t the Communists are showi themselves in bad temper w their Socialist allies because p point up a growing Socialist r vance over the Communists.

City Hall Sit-In

PARIS, Feb. 16 (AP).—Abo 60 members of two ultra-lef political organizations staged sit-in at City Hall today to pro a ban on public meetings in Paris sports stadium.

They occupied the office Nicole de Hautecloque, presid of the Paris City Council, a several nearby rooms.

Police dragged and pus them out without further i dent.

The Lutte Ouvrière (Wor Struggle) and Communist Le parties are minor groups on extreme left of the French litical spectrum.

Bittersweet Moments in POW Homecomings

By Steven V. Roberts

Relics of Captivity on One Hand, Families, Flag, Home on Other

TRAVIS AIR FORCE BASE, Calif., Feb. 16 (NYT).—When Helen Brunstrom was unpacking her husband's duffle bag Wednesday night, she found a pair of worn sandals and a small cup and spoon, the only utensils he had used during almost seven years in a North Vietnamese prison camp.

As she was looking at the sandals, Lt. Col. Alan Brunstrom returned to his hospital room, and said sharply: "Put that stuff away and don't touch it again."

That was about the only time that Col. Brunstrom revealed the glimpse of the world that he and the other former POWs have just left. As his wife said later, "He doesn't want to be reminded of it."

The Brunstroms are among dozens of families that were reunited at hospitals across the country in a day that was filled with the small, joyful moments of homecoming.

Capt. Hayden J. Lockhart jr. walked down the ramp of a plane here and was greeted by his wife and a 7-year-old boy named Jamie—a son he had never seen.

One Navy officer could not salute with his withered right arm. Lt. Comdr. Rodney A. Knutson, a bachelor whose captivity lasted more than seven years, ardently kissed a blond Navy nurse and told newsmen," I'm sure gonna chase girls."

Capt. James Bond Stockdale, the highest-ranking Navy captain and an amateur student of philosophy, spoke for the first plane-load of returnees yesterday and quoted an unknown Greek poet with these words: "Nothing is so sweet as to return from the sea and listen to the raindrops on the rooftops of home."

The Brunstroms were one of the first families to see each other, since Mrs. Brunstrom came here from her home in Tacoma, Wash., to meet her husband's plane. At a news conference this morning, she gave her first impression of her husband:

"He looked tired, he looked older, but physically his body looks good. He used to be heavier. He lost about 60 pounds, and it made me nervous to feel his ribs."

Dressed in a plain knit suit, with her brown hair piled on her head, Mrs. Brunstrom said they had talked long into the night, mainly about friends and the men of his old squadron, some of whom will not return.

"He was talking incessantly," she said, "and he was still talking this morning. I hope he runs down."

Perhaps Mrs. Brunstrom's strongest impression was the loyalty her husband felt toward the country, and his fellow prisoners, particularly the senior officers.

"He calls them 'captain' and 'colonel' in such respectful tones, there must have been very strict discipline among the fellows," she said. "And if he said it once he must have said it five times, 'Look at that flag.'"

The world, and his family, have changed in Lt. Col. Brunstrom's absence, and he was stunned to notice that his 13-year-old daughter was wearing a bra. "Are those straps what I think they are?" he asked his wife. When she confirmed his impression he exclaimed, "Oh, my God, she was only 4 1/2 when I left."

According to her mother, Katherine Brunstrom remembers only a few things about her father: One time when he spanked her for spitting out food, another when the family went blackberry picking. The girl asked is she could just sit in his hospital room, even if he was too busy to talk to her.

Mrs. Brunstrom, now 39, has also felt the effects of separation. "I told him I'm bossier now, and he'll have to sit on me," she said with a smile. "He said he thinks he's capable of it."

Asked what had surprised her husband, she said, "I think the prices in the PX [at Clark Air Base] confused him. I think that's why he didn't have any clothes." He also thumbed through some automobile advertisements and was "shocked," at the price of a radio he wanted to buy.

The Brunstroms are nibbling the future in small bites.

"We had a little argument about whether to take a car or an airplane on our vacation trip. He has an eye on an airplane he wants to buy," she said. "And I told him the roof needs cleaning, and he said he'd do that when he got home."

(Yesterday's readings, G.M.T. At 1200 GMT, [illegible])

Who are those hooded men in Texas and why are they now showing their faces?

(Continued from Page 1)

lice departments in the South-n United States.

I had been secretly approached the Houston Klan and made tempting offer. The Klan, I as told, had a message for the rld. To get this message across ey would be willing for the first me to make some major conces-ons in their century-old policy ultra secrecy. I would be al-wed to interview, photograph d give names and addresses of embers of the Klan and their milies in Texas. I would be lowed to photograph night ders and even members of Texas lice departments who belonged the Ku Klux Klan.

I was warned, however, that lice members of the Klan would extremely nervous of having eir identities revealed, that they ced losing their jobs and pos-ible prison terms if their Klan sociation became known. There-re, of all the Klansmen I would hotograph, only police members ould remain masked and hood-d. They could become dangerous they thought they were being lentified, I was warned.

The message from the Ku Klux lan turned out to be both an dmission of defeat and the an-ouncement of an entirely new attle and purpose for the organ-ation.

I was told that it had been decided" by the new and younger aders of today's Ku Klux Klan hat black people in America "are ere to stay," that the Klan had iven up for now its long battle gainst integration and accept-nce of blacks into American ociety.

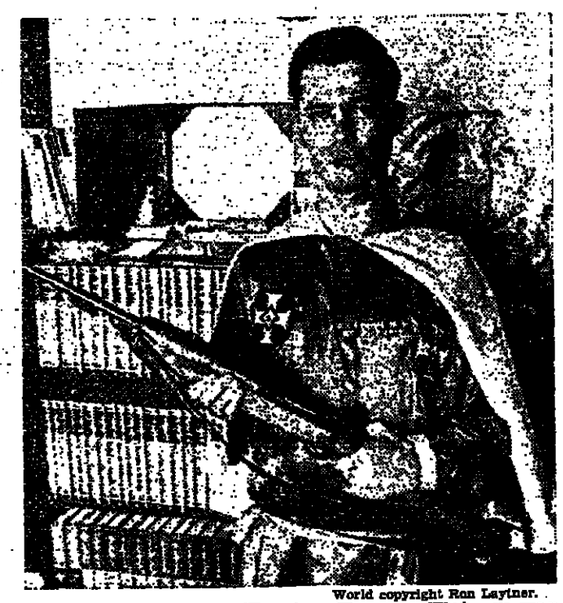

The Klan was now battling a ew and far more dangerous nemy to America—Communism. The burning issue of the modern Klansman of today is the grave hreat to America of a "World Communist Conspiracy."

The KBI

And so for two weeks I was al-lowed to enter the night world of the Ku Klux Klan. I discovered that in Houston today when the modern Klansman leaves his blue collar, hard-hat construction, auto mechanic or service-station job at the end of a day, he enters a world of espionage, terrorism, in-filtration and counter-intelligence activity. This is the KBI—the Klan Bureau of Intelligence.

The Klansman who might be a gas station attendant by day can spend his off-hours infiltrating suspected Communist front or-ganizations, terrorizing leftists, socialists and liberals—all mem-bers, according to the Klan, of a massive army of subversives try-ng to take over America.

A KBI member can, and actually does, infiltrate groups such as the Students for a Democratic Society, which the KBI has labelled as enemy. He can join squads of adio cars driven by armed men who keep in constant radio com-unication as they follow suspect-ed Communist agents around

World copyright Ron Laytner.

Louis Beam jr., 26, of Houston, Texas, a Vietnam war hero who says he wants to continue the fight against Communism in America. He is dressed in his officer red robe of the Ku Klux Klan on which he has pinned his service and award ribbons. He is holding his semi-automatic carbine which is "good for close-in street fighting." On the bookcase behind him, is the Distinguished Flying Cross Citation he received in Vietnam. Over his shoulder is a poster of his hero, Gov. George Wallace of Alabama.

Houston's maze of superhighways. And he can sneak into the bedrooms of suspected Communists and leave a KKK threat on a suspect's pillow.

The battle between right and left in Houston has been marked by bombings, shootings, beatings and burnings, many of these at-tributed to the Klan.

My contact man in the Houston Klan was Louis Beam jr. of Hous-ton, a Vietnam war hero, holder of the Distinguished Flying Cross. His friends in and out of the Klan consider him to be an American Super Patriot.

Shortly after returning from Vietnam, Beam gained national and international attention when he charged into a crowd of 500 anti-war demonstrators in Hous-ton and seized a Viet Cong flag they were carrying. The 150-pound Vietnam war hero was rescued by police. "They had to arrest me," he said, "but they really wanted to shake my hand."

The FBI

Not long after this, or maybe because of this, the FBI began to check on him. "They came to my father and asked him ques-tions about me. Of course, my father is what I would consider a liberal—we do not agree at all insofar as our philosophies are concerned.

"The FBI told him they were checking on me because some of these young people nowadays want to take the law into their own hands.' A few weeks later, and for the first time, they visit-ed me and were very polite and asked me why I was in the Klan and what were my politi-cal philosophies.

"I didn't mind telling them what I believed but I wouldn't give them any information on the Klan because I am sworn to secrecy. After that they weren't so polite—and they have inter-rogated me about four other times since."

Beam was fond of his M60 machine gun in Vietnam which fired 750 rounds per minute and allowed him to run up one of the highest personal scor-ing body counts of any Amer-ican helicopter gunner in the war. He still likes guns.

"I keep several weapons in my house. I have one by the door and another in the bedroom and I always have a weapon in my car. I won't drive my car without one.

"This is because I have receiv-ed numerous threats on my life since becoming politically involv-ed. I am at 100 percent readiness, ninety percent of the time, pre-pared to defend myself against anybody and anyone who would seek my life. They'd probably lose theirs.

"In my car I carry a U.S. mi-litary .30 caliber M1 carbine. It's a semi-automatic weapon and can hold thirty rounds. It's de-signed for close-in street fight-ing—a good weapon to carry."

When I met him he was an honor student in a Texas univer-sity, hoping to become a lawyer. He also told me that he was an officer in the Houston Ku Klux Klan and a very active of the KBI

He was attending meetings of the Klan and university classes under the weight of two State of Texas Grand Jury indictments in connection with the mystery bombing of a liberal Houston radio station, Pacifica. Beam didn't believe Texas had grounds for a case against him and later, just as he had predicted and to the exact day, the indictments against him were dropped.

"After I got home, from the war", the 26-year-old Beam told me, "things didn't seem like they were before I went to Viet-nam. Everyhing seemed differ-ent. The whole climate of the nation had changed. Before I went over to fight most of the people seemed behind us soldiers —but when I returned it seemed the majority of Americans were against us, against the war as a whole.

The Other War

"I think the anti-war offensive by the left-wingers was at its height in 1968 soon after I got back. I watched them burn an American flag in front of the Capitol on TV and that minute—that second—I knew something had to be done by me as an individual," Beam said. "I knew the battle wasn't over with. The mere fact that I had returned from Vietnam didn't mean the war was over. It was going on right here in the States. I knew right then and there I had to get engaged again and fight the enemy. The only prob-lem was over here if you kill the enemy you go to jail. Over there in Vietnam if you killed the ene-my they gave you a medal.

"I looked around and I in-vestigated several conservative or-ganizations to see which one was probably doing the best job to fight Communism," said Beam.

He checked out the John Birch Society and found it too mild. The Citizens Council which is sometimes wrongly known, ac-cording to Beam, as the White Citizens Council, "was an organi-zation that opposed forced inte-gration," he said. "And this isn't what I was concerned with. I also was opposed to forced inte-gration but the main thing on my mind was fighting Communism—not the race issue.

"Next I investigated the Min-utemen. Now this was a little better. These people were getting down to what I felt needed to be done. They were prepared to fight the enemy. But this orga-nization was highly secretive and I really didn't like that. I didn't like the idea of having to be a member of an organization and not to be able to tell anyone—not anyone at all—that I was in it and what I was doing."

There were other right-wing or-ganizations too. "The American Nazi Party is something which is run by a few fanatics who have nothing else better to do," said Beam. "It's ridiculous. My father fought in Germany against the Nazis and anybody my father would fight—I'll fight too. I have no sympathy for such fanatics. I'm opposed to everything they stand for."

Frank Converse

Shortly after Beam's Viet Cong flag incident, he was approached by the Grand Dragon of the Ku Klux Klan in Texas.

"His name is Frank Converse and he's an extremely big man," said Beam. "When you look at him you know that if he wanted he could take his arms and just rip you in two. He's an extreme-ly powerful man. And yet, this man is intelligent also, a very good and gentle man and he's not opposed to the black man either. Even at Klan meetings which are sacred and anything can be said, he has always said 'Boys, the road is long and wide. There's room for both of us to walk down it. If we don't want to walk together then one of you get on the other side of the road. Don't kill each other trying to walk down the same side.

"Converse owned a gunshop be-fore his leadership in the Klan was made known and before he was shut down, harassed, arrested by the federal government and burned out of business," said Beam. He is an extremely well educated man. And when I got back from Vietnam he told me a lot of things that astounded me. He put forth the idea to me for the first time that there was a co--tracy to bring about Social-ism. And he said the United Nations had a lot to do with it.

"This sounded preposterous to me. I didn't believe it. But he gave me many books. And the more I read and the more I in-vestigated on my own—I began to believe that there actually was a conspiracy of some kind... And I decided then that the Klan was the proper organiza-tion to fight Communism."

Beam said at first he didn't want to join the Klan because he knew it had a bad reputation. "There's a saying here in the South that on Saturdays the Klan goes out and hangs a nigger from a tree. And that to me didn't sound too good and I thought possibly this was the kind of organization it was," said Beam.

The Klan, however, turned out to be the type of organization that some of its newer modern publications said it was, accord-ing to Beam. "Now this is not to say that the Klan doesn't be-lieve in segregation or doesn't be-lieve in white supremacy—they do. However, nowadays this is secondary. I personally am a segregationist. I believe it's right . . . However I am not prejudiced. I judge each black man on an individual basis and then make my value decision on him personally."

Shortly after joining, Beam's dedication to Klan business earn-ed him the role of an officer in the Klan and a bright red hood, mask and robe rather than the common white outfit. He became a sort of president of the Houston unit.

Now, he spoke to me of police-men in the Klan. "A lot of ar-ticles written in U.S. newspapers accuse the Klan and the police department of working together. This is not true. It is true that a lot of people in the police department believe as we do and after all, policemen should support law and order, and that's what we believe in," he said.

"There are definitely quite a few policemen who are members of the Klan. One of my duties has been to swear in individuals into the Klan and I have per-sonally sworn in, in the last year —I can't give the number because it's secret—but quite a few City of Houston policemen and at least several Sheriff's Department of-ficers. And also we have other people who are secret members of the Klan who are in city govern-ment."

How big is the Klan in Amer-ica today?

According to Beam, "The Klan in the United States has almost reached the point now where we have more members in the North-ern States than we do in the South. Michigan is the largest Klan in the United States. And we also have quite a large Klan in Ohio. We are in approximately 48 states. Either in a small way or in a big way. Our member-ship in the United Klans of Amer-ica is well over 100,000—how much I cannot reveal.

International

"And the New Klan — the modern-day Klan has gone inter-national," Beam said. "We have a unit in Australia. We have one in Italy and we have one in En-gland. And when I say a unit I mean that we have a nucleus in each one of these countries that is organizing and is branching out to form what we're going to have pretty soon, by 1976, an In-ternational Ku Klux Klan, an ef-fective world-wide organization dedicated to fighting Communism.

"Now if you just stop to think for a moment," explained Beam. "It's obvious to both of us and all of us that the race issue plays no part. Because who are the Italians going to be against? The Protestant Italians? Ridiculous.

"The English Klan was started right here in Houston after the Grand Dragon received letters from a group of men in an area of England called Lancashire who said they had heard a lot about the Houston Klan.

"However, I am afraid that the English Klan is more interested in racism than in fighting Com-munism at present. I am told that England has some kind of race problem. These people told us they were concerned with the large influx of aliens and for-eigners into their country.

"In Canada we have just re-cently opened up a brand new Klan. Up in Calgary, Alberta, our new Klan almost overnight has become a tremendous influ-ence on the people. It has achieved more success than I had any idea it would."

John Grindle

John Grindle, 30, gas station owner, white Anglo-Saxon Pro-testant, staunch member of the Texas Ku Klux Klan, was sitting on the edge of his desk in Livingston, a few hours drive southwest of Houston.

In one hand he held a big black Bible. In the other he held a hair-trigger semi-automatic rifle. On his head he wore a western hat with a Confederate flag. On his shoulders were Con-federate flag patches and around his waist was a loaded ammuni-tion belt.

He spoke of God and Love—but on the wall behind him was a yellow Klan bumper sticker of hate. It listed as "Signs of the Anti-Christ," peace movements, the United Nations, the Jewish people and Communism.

A giant American flag was pinned to the wall in a nearby room next to the restrooms and beside an assortment of Con-federate flags from the losing South in the American Civil War was a badge sticker on a wall saying "Friend of Police." A col-lection of loaded rifles and shot-guns stood in various corners around the room.

Staring down from its place of honor was a glass-covered color framed portrait of the Imperial Grand Wizard of the United Klans of America, Robert Shelton, complete with fiery cross in the background.

He was proud of his member-ship in the Ku Klux Klan. He, too, tried to convince me that the Klan has given up fighting blacks and integration and has switched to fighting international Communism, which the Klan be-lieves is trying to capture Amer-ica.

Beam had been excited about our trip to Livingston, loading up his semi-automatic carbine in his car and laying in a supply of ammunition after hearing "re-ports" that black militants had been seen driving around the Grindle gas station in the little town. But when we got there the only black people around the gas station were the drivers and occupants of out of state cars who dropped in for gasoline. They received quiet but not un-friendly service from the Con-federate-flagged attendants. Some who entered to use the restrooms left after spotting the Klan burn-ing cross picture.

Just a Man

"I have belonged to the Klan for a good while" said John Grindle, and I really and sin-cerely believe it is the last chance for a free and Christian world. And what a lot of people don't stop to think, when I call my-self a Klansman—they say 'Well, he does this and he does that'. They're wrong.

"I put my britches on just like all men do—one leg at a time. I love my wife and children just like all men do. I do kneel down by my bed and say my prayer every night and I don't know a whole lot of people who do this. I'm not ashamed to kiss my kids goodnight and join them in their prayers before they go to sleep. There is always a chance they won't wake up the next day."

"The Good Lord has been good to me and I hope He is equally as good to my children and that is the only reason that I am in-volved in the Klan. Because only the right-wing organization fac-tions of government stand for God and Country. This country was based on Christianity and as long as we believe in Christ-ianity we will stand.

"My personal preference for President, had he not been shot in a Communist conspiracy, was George Wallace. Not because of his stand on racism or his stand on things—but on his belief in the individual rights of man.

"We in the Klan we don't want to fight our fight on the streets. We want to fight our fight with the vote. Get good God-fearin people to cast their vote and put good God-fearin people back into our public offices and give every-day Christians a chance. That's all we are asking for.

"I belong to the Klan because I can do some good for my coun-try—but I'm not appreciated. The local newspaper ran a story on me and said I was a cancer in the community and should be removed. Can you imagine that? A cancer! It really hurt me to have such a thing said."

A MASKED and hooded Klansman on a spirited white horse galloping across a field near Livingston, Texas, last month. These riders are essentially symbolic of the past, a time when men such as this one would have ridden across the fields in Negro areas of the U.S. South, burning crosses, lynching, and terrorizing with virtual impunity. Today, the Klansman on the horse had to end his ride before broad daylight for fear he would be seen by federal agents, who might have arrested him, or black militants, who might have shot him.

Unions Denounce Production Curb On Concorde

LONDON, Feb. 16 (Reuters).—British and French labor unions declared today that they would not permit any slowdown in pro-duction of the Anglo-French Con-corde supersonic jet.

The decision was reached fol-lowing what was described as the most important meeting held by French and British union leaders.

They discussed manufacturers' warnings, following the recent loss of major American airline customers that the production of the Concorde may have to be slowed down, or perhaps con-fined to either Britain or France.

After the meeting, the leaders issued a statement saying:

"If the project is slowed down, this means—without a doubt—that we are surrendering leader-ship entirely to the Americans in scientific manufacture.

"We entirely reject this defeat-ist approach, which we are con-vinced would lead to a reduction in the standard of life of both our people."

Soviet A-Test Detected

UPPSALA, Sweden, Feb. 16 (AP).—A new nuclear explosion in a series of Soviet underground tests in Siberia was registered by the Seismological Institute at Uppsala at 6:09 a.m. today. The institute said that the blast was of strong force.

Orange Volcanic Moon Soil Is Dated at 3.7 Billion Years

WASHINGTON, Feb. 16 (WP).—The orange soil found on the moon by the Apollo-17 astronauts was the product of lunar volcanic activity that occurred 3.71 billion years ago.

This discovery was made public yesterday by a team of scientists at the State University of New York at Stony Brook. It strongly suggests that the moon did not have an active volcanic period at any time in the last three bil-lion years.

"It can now be reasonably stated that volcanism on the moon was a phenomenon which ended three billion years ago," Dr. Oliver Schaeffer, the head of the science team that dated the orange soil, said. "It appears that the orange soil was formed in the same volcanism that laid down the dark lavas on the moon."

The finding that the orange soil was formed so long ago came as a disappointment to many geolo-gists, who felt at the time the astronauts discovered it that it might be the youngest soil ever returned from the moon.

Some geologists speculated that the orange dust might be no more than 100 million years old, which would have meant that lunar volcanoes were erupting that re-cently in time.

One question about the orange soil that baffled lunar scientists was that it was lying undisturbed on the surface of the moon for so long. It was found forming a circle around the edge of a volcanic-looking crater named Shorty, which led scientists to believe that the orange soil had been vented out of the crater when it was formed.

"Our cosmic ray exposure age for the soil is only 30 million years, meaning that the soil has only lain on the moon exposed to the sun for that time," Dr. Schaeffer said. "The crater was probably formed 30 million years ago by a collision of a meteoroid, which brought the orange soil to the surface."

Ugandan Says Women Could Be Executed

KAMPALA, Uganda, Feb. 16 (AP).—A senior army officer has warned that Ugandan women who assist guerrillas will be executed in public by firing squad, Radio Uganda said today.

Col. Moses Ali told a rally in the Madi district of northern Uganda that last weekend's public executions of 12 men were "just a beginning and will con-tinue as long as guerrillas con-tinue to disrupt our peace."

"The guerrillas have turned to the tactics of using girls, and the military tribunal will not hesitate to try any lady who is found to be an agent of guerrillas," he said. "When found guilty, she will also be publicly executed."

Prostitutes Form Union In Sweden

STOCKHOLM, Feb. 16 (AP).—Swedish prostitutes who pose as "models" have formed their own trade union "to protect their rights in business and social matters," the semi-official Swedish do-mestic news agency, TT, re-ported today.

The union, with a member-ship of 107 so far, met last night for an organizing session in an undisclosed suburban location. Rules were agreed on and leaders chosen. Their names were not revealed.

The women also decided to start their own advertisement and contact publication.

Irving Files Suit Against Publisher

NEW YORK, Feb. 16 (UPI).—Clifford Irving, who was paid more than $500,000 for his fake "autobiography" of Howard Hughes, has sued the publishers of the book he wrote about the hoax for $75,000.

Irving, now serving a 2 1/2-year sentence for the hoax, said in the suit filed yesterday that Grove Press, Inc., and its sub-sidiary, Zebra Books, had agreed to pay him on July 15 but that the money was never paid.

Seven Months in Danger Zone

U.S. Spacecraft Unharmed by Asteroid Belt

By Thomas O'Toole

WASHINGTON, Feb. 16 (WP).—The first spacecraft to fly into the asteroid belt between Mars and Jupiter has emerged unscath-ed from its seven-month voyage through the 270-million-mile-wide region.

"We thought we'd encounter more dust than we did, and there was even some question as to whether we'd survive the belt," Dr. William Kinard of the U.S. space agency told a press briefing yesterday on the Pio-neer-10 flight. "The fact that we did tells us the asteroid belt is no obstacle course."

The fact that Pioneer-10 sur-vived the asteroid belt also tells scientists that the region itself is not made up of millions of tiny bodies produced by either the collisions of larger bodies or the recent breaking up of a planet that once existed between Mars and Jupiter.

The tiny sensors and telescopes aboard the 550-pound spacecraft discovered sand-sized particles in its path through the belt no more than once a day. The sand was evenly distributed all the way through the belt, from the side nearest Mars to the outer edge closest to Jupiter.

The number of tiny particles even smaller than sand seemed to decrease as Pioneer-10 sped through the asteroid belt, sug-gesting that most of the small particles in the belt come from comets instead of asteroids.

"I think the smallest particles are not being formed from asteroids," Dr. Martha Hanner of New York's Dudley Observa-tory said. "I think it also means that a lot of the smallest particles in the belt are being swept up out of the belt by the gravita-tional forces of the sun."

Never did the spacecraft see one of the large asteroids that sweep through the belt, mostly because Pioneer's path through the belt was calculated to take it away from the large asteroids.

"The closest we came was about 4 million miles," Pioneer project manager Charles F. Hall said. "That was an asteroid about seven miles in diameter."

Besides measuring the size and extent of the asteroid belt, the instruments aboard Pioneer-10 made the most distant observa-tions of the solar atmosphere and solar wind ever taken.

Pioneer-10 found that the sun's atmosphere expands with distance, just like a cloud rising into the atmosphere on earth. The spacecraft discovered that the solar wind becomes slower but hotter with distance from the sun.

"Velocity dropped by a factor of two," Pioneer project scientist John H. Wolfe said, "but tem-perature increased by a factor of two."

U.S. War Objector Named in 7 Murders

SANTA CRUZ, Cal., Feb. 16 (UPI).—A conscientious objector, voted "most likely to succeed," by his high-school class, is charged with seven murders in the Santa Cruz area.

Herbert W. Mullin, 25, was arraigned in Municipal Court yesterday and placed under a $300,000 bond. He is charged with killing a woman and her two sons at a remote mountain cabin Jan. 24, a Santa Cruz couple at their home the next day, an elderly man in his garden Tuesday and a Catholic priest inside a confessional.

Police said Mr. Mullin was a member of the local drug sub-culture.

Monster Sanctuary

LITTLE ROCK, Ark., Feb. 16 (UPI).—The Arkansas Senate passed a bill yesterday prohibit-ing assault on a river monster allegedly seen occasionally during the last 100 years in northeastern Arkansas. The bill makes it il-legal to "molest, kill, trample or harm" the creature and creates the "White River Monster Sanc-tuary and Retreat" at Newport.

The Home Front

The 10 percent devaluation of the U.S. dollar was indeed a bold action necessitated by the chaos in the international money markets, but it scarcely provides occasion for Mr. Nixon to claim a triumph for the way he has managed the American economy. On the contrary, the administration's policies have done much to exacerbate a situation that had been in the making for a decade—partly because of the Vietnam war.

It is not as if monetary crises, like hurricanes, were acts of God. The administration most recently contributed to the weakening of the dollar by scuttling wage and price controls in a secret deal to obtain organized labor's political support—at a time when the economy was starting to boom, when food prices were skyrocketing and when new figures on the worsening trade deficit were alarming world financial markets.

Mr. Nixon's fiscal and monetary policies since the election have been no more reassuring than his scuttling of wage-price controls. Having seriously eroded the U.S. tax base, particularly by chopping taxes on business, Mr. Nixon emerged from the election with a new sacred principle: He would never raise taxes; the guilt for any tax increases would be on Congress' head, not his.

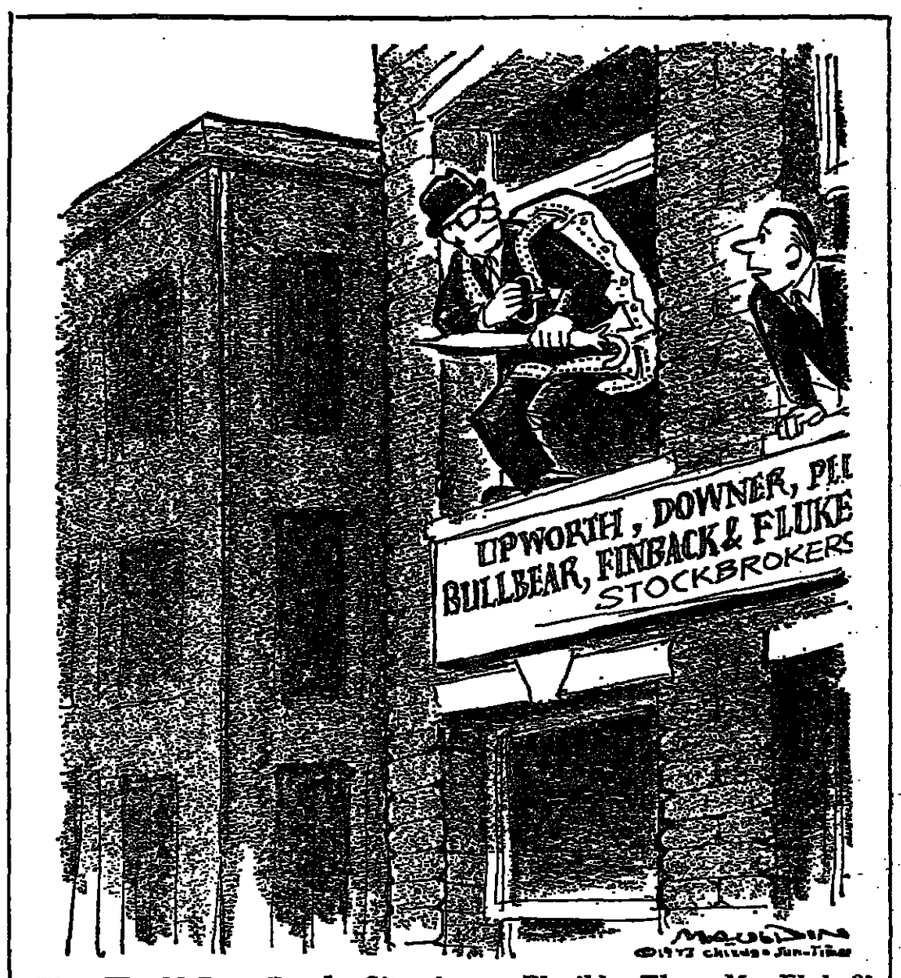

After piling up deficits totaling almost $80 billion in his first term—with more deficits ahead, despite the rapidly climbing economy—Mr. Nixon still will not consider raising taxes. Instead, he means to break Congress to his will by cutting social programs that might improve the trade-off between inflation and unemployment.

In the area of monetary policy the administration has put Dr. Arthur Burns, chairman of its Committee on Interest and Dividends, in the ridiculous position of jawboning down the interest rates that, as chairman of the Federal Reserve Board, his highly stimulative monetary actions have caused to rise.

Mr. Nixon cannot permanently rescue the dollar until he stops politicizing every economic decision, while blasting Congress—and foreign governments—for not submitting to his dictates. Instead of seizing devaluation of the dollar as the occasion for threatening protectionism if other nations do not liberalize their own trade restrictions, Mr. Nixon would have done more to reassure international financial markets on the outlook for the dollar by stressing his determination to stop inflation, which the devaluation could in fact worsen. The President could have done this by announcing measures to strengthen Phase-3 wage-price restraints and to make fiscal and monetary policy more flexible, even if this meant higher taxes and higher interest rates.

A strong dollar cannot be restored until the administration convincingly demonstrates that it is willing to use whatever tools are required to achieve both stable prices and full employment and that it has not simply reverted, for political or ideological reasons, to the discredited economic doctrine with which Mr. Nixon began his presidency.

THE NEW YORK TIMES.

'You Would Describe the Situation as Flexible, Then, Mr. Fluke?'

Crisis in Uruguay

Uruguay has emerged from its worst political crisis in four decades with heavy damage to the democratic system that was once the pride and envy of the Americas. President Juan Bordaberry has remained in office only by ceding a large measure of his constitutional power to military leaders who assert the right to select key cabinet members as well as to chart drastic reforms to cope with corruption, inflation, unemployment and an outdated land-tenure system.

Long-overdue reforms in Uruguay have been diluted, delayed and scuttled by a combination of lethargy, a swollen parasitic bureaucracy and a crazy-quilt pattern of parties within parties that has destroyed accountability and rendered government decision-making all but impossible. Until they resorted to kidnapping and murder, the Tupamaro guerrillas enjoyed a large measure of public tolerance in their agitation for reform and their exposure of corruption in high places.

There is irony in the fact that Mr. Bordaberry is now a victim of the very success of his decision to supplant the police by the armed forces in his "internal war" against the Tupamaros. In the course of destroying the guerrilla organization, the military leaders themselves become painfully aware of the defects of Uruguayan society which the Tupamaros had exploited.

Unfortunately there is nothing in the record of the armed forces to suggest qualifications for tackling Uruguay's most pressing problems in a realistic way. The 19-point "program of national reconstruction," issued by the military chiefs, seems inspired by the clumsy actions of Peru's military junta and reflects a simplistic approach to complicated questions.

There is, however, plenty of civilian talent in Uruguay for resolving such problems and carrying out necessary reforms. The hope must be that under the spur provided by the military—and the realization of how narrowly the country averted an outright military takeover—the talented people of this divided country will come together again to solve their problems within the framework of their admirable democratic system.

THE NEW YORK TIMES.

The Cabinet Big 3

By James Reston

WASHINGTON.—The focus of American foreign policy is now obviously moving away from the war in Vietnam to the great economic questions now troubling the nations, and this is bringing new men and new problems to the fore in Washington.

President Nixon remains, of course, the dominant figure across the board, with Henry A. Kissinger as his principal agent in the negotiations with the principal Communist powers. But the intricacies of money, oil, trade, and military arms control—the rising questions—are not Kissinger's specialties, so the Treasury, Defense and State Departments are now beginning to get a little more attention and power.

Similarly, as the fierce debates over Vietnam in the Senate Foreign Relations Committee subside, the leaders of the House of Representatives, with their special interest in money and trade questions, are likely to recapture some of their lost authority.

Crisis Shifts

Fortunately, as the emphasis switches to the dollar crisis, the energy crisis, and the arms crisis—the nations of the world are now spending over $220 billion a year on arms—President Nixon has put together at Treasury, Defense and State a team of cabinet and subcabinet officers who are unusually trustful and congenial with one another.

The new secretary of defense, Elliott L. Richardson, may not have Mel Laird's easy rapport with the leaders of the House and Senate, but he was Secretary of State Rogers's deputy early in the first Nixon administration and has had a long and close relationship with Henry Kissinger both at Harvard and in Washington.

The chances are, therefore, that we will manage to avoid some of the sniping between the Pentagon and Foggy Bottom that often marred the relations between Lewis Johnson and Dean Acheson, "Engine Charley" Wilson and John Foster Dulles, James Forrestal and James F. Byrnes in previous State-Defense battles.

Despite the proliferation of interdepartmental committees in recent years, there is always the problem here of each department seeing the world only from its own isolated position, and presumably this was what Nixon had in mind in elevating Shultz to the head of the new Council on Economic Policy over the secretaries of state, commerce, agriculture, labor, transportation and the other principal economic councils.

It is still not quite clear how the secretary of the Treasury is going to run his own department plus the new council, unless the President manages to invent the 48-hour day, but one thing the President's reorganization has done: It has put into key positions in the major departments knowledgeable men who have had wide experience in other departments.

Thus, Shultz himself is a former secretary of labor and head of the White House Office of Management and Budget. The new deputy secretary of state, Kenneth Rush, was formerly U.S. Ambassador to West Germany and deputy secretary of defense. Dr. Kissinger's principal assistant in the critical phase of the Vietnam cease-fire negotiations, Gen. Alexander M. Haig jr., who is now vice-chief of staff of the Army.

So we are beginning to get a little more cross-fertilization in the second Nixon administration. For example, Paul H. Nitze, former director of the State Department's policy planning staff under President Truman and secretary of the Navy and deputy secretary of defense under President Johnson, is now back at the Pentagon, after a long experience in international trade and arms control, as assistant to Secretary of Defense Richardson on the strategic arms talks with the Soviet Union.

Also, top State Department officials are now being brought more prominently into national security discussions with Kissinger than at the start of the Nixon administration. Assistant Secretary of State for East Asia and Pacific Affairs Marshall Green is directing the Vietnam reconstruction studies. William H. Sullivan was a principal assistant to Kissinger in the Vietnam peace talks, and Alfred le S. Jenkins, director of Asian Communist affairs in the State Department, accompanied Kissinger on his latest trip to China.

It is undoubtedly too early to tell how this second-term reorganization is going to work, but the warm personal relations between the state, defense and treasury secretaries have given it a hopeful start, and the indications are that the State Department will be a much livelier place in the next four years than it was in the last four.

Already, President Nixon has made more cabinet appointees in his first four years than any other President except Grant. He has made 36, one more than Roosevelt in four terms, and this has at least created an atmosphere of new initiatives and a new beginning.

The Future of Vietnam And the Role of Aid

By Flora Lewis

PARIS.—Although continuing official Vietnam meetings remain focused on the stability of the cease-fire, various talks are getting under way between the rival South Vietnamese factions about their country's political future.

The key, as seen by Vietnamese here of assorted allegiances, is the form in which foreign economic aid is delivered and administered. In a sense, the aid will be to the forthcoming political warfare in Vietnam what U.S. air power was to warfare even after the Americans withdrew from major ground combat and undertook Vietnamization: By either its presence or its absence it will have intense effects.

This is so in both North and South, but in quite different ways.

A Major Tool

Reconstruction aid is a major tool with which the United States hopes to wedge the North into a position of desiring to maintain the peace long after the last American GIs and POWs have gone home.

The first step in that policy was taken during Henry A. Kissinger's talks in Hanoi. As a result, it has been announced that the United States and North Vietnam have agreed to establish a joint commission to develop mutual economic relations.

In the South aid will unavoidably become a major weapon among the rivals for political ascendancy. Whether it is delivered by the United States and other countries directly or through international organizations, the way it is used and the South Vietnamsse groups that handle it and direct its use will be politically crucial.

South Vietnamese Communist officials in Paris, according to some people involved, have begun energetically seeking contacts with non-Communist South Vietnamese exiles to discuss future politics.

One thing they have been talking about is economic aid. The sources said that the Viet Cong did not object now to continued direct U.S. delivery of economic support to President Nguyen Van Thieu, pointing out that in the period between cease-fire and peace they too are getting direct support from their allies.

In any case, that view was implicit in the Communists' abandonment of their long-standing demand that Mr. Thieu be removed before a cease-fire and in their willingness to sign an agreement that left negotiations for a political settlement to the South Vietnamese.

Looking Ahead

The Viet Cong are now looking further ahead.

The first step in the negotiations, as defined in the cease-fire accords, is to be the establishment by Saigon and the Viet Cong of a National Council of National Reconciliation and Concord, in three segments.

The two sides are pledged "to do their utmost" to set up a council within 90 days of the cease-fire—a deadline unlikely to be met but which nonetheless exerts some pressure. The third segment was in no way defined, and it will be a vital consideration for both sides.

The assumption during the negotiations was that it would somehow represent the many South Vietnamese factions whose allegiance has not been clearly tied either to the Viet Cong or to President Thieu's government.

The haggling during the cease-fire negotiations and conversation with the rival parties since then have demonstrated that Mr. Thieu and the Communists have sharply different ideas about the third segment and the council's role.

All the signs have been that Mr. Thieu does not trust his non-Communist opposition, in the country or in exile, to support him against the Communists in the council.

On the other side, there has been mounting evidence, both in public statements from Hanoi and in private comment in Paris, that the Communists look to the third segment as a most important element in their long-term plans.

North Vietnamese and Viet Cong leaders have said repeatedly that they do not aim for a Communist take-over in the South but for a "national democratic revolution." South Vietnamese nationalists here believe that this is true and that it reflects the Communists' awareness that they do not have the strength to dominate the country—that they must look for third-segment people who will cooperate.

The aid question enters at this point. If economic support is channeled through Saigon, it will greatly enhance the likelihood of a thumping victory for the president when the time comes for election of a postwar government. Therefore the Communists have begun to talk with likely third-segment adherents about the desirability of channeling aid through the national council—which Mr. Thieu can be expected to resist, since it would give the council just the governmental power he has refused to relinquish.

Distorting Influence

Under the best of circumstances large infusions of foreign goods and money have a distorting influence on national life. This is more the case in an undeveloped country, especially so in a war-torn country and overwhelmingly so in a country riven by civil strife.

The United States never did find a way of delivering economic aid to South Vietnam without producing deep social disturbances. The postwar problem will be intensified by the political struggle.

It is an issue that goes beyond the power of the Vietnamese to settle among themselves. Willy-nilly, the way foreign suppliers, including the United States, decide to deliver help will be a form of intervention favoring one South Vietnamese faction or another. It is likely to involve the United States, the Soviet Union and other countries in the Vietnamese dispute until there is a new South Vietnamese government recognized by all.

International Opinion

After the Dollar's Devaluation

The international monetary system has again started to re-establish a framework of stability and equilibrium mainly on the basis of this week's devaluation of the American dollar, but it must be remembered that the United States, even after the previous devaluation of the dollar, came up last year with a gigantic trade deficit of $6.4 billion. So unless Washington exercises moderation in its external payments balance, it is quite likely that the newly achieved world monetary equilibrium will be short-lived. Along with efforts to settle the worldwide feelings of unrest over the stability of the U.S. dollar, a much quicker timetable is needed for the scheduled negotiations on reforming the world's monetary system.

—From the Asahi Shimbun (Tokyo).

* * *

The latest currency crisis has amply illustrated the fragility of the first phase of the monetary union in the European community. This is not accidental. It is a direct reflection of the fact that the nine member governments manage economies which, though increasingly interdependent, are nevertheless significantly different from each other. Despite the heavy political overtones attached to it by the French government, European monetary union is much less urgent than a reform of the international monetary system, and probably cannot make any solid progress until the wider system has been given some lasting stability.

—From the Financial Times (London).

* * *

Unable to undertake common action because its currencies are attracted, some upward, others downward, Europe was able by its very inaction to compel the United States to devalue the dollar: this is what just happened. The new realignment of the dollar does not solve in depth any of the plagues suffered by the international monetary system, notably the abundance of false liquidities. To get out of that situation there is in the end no other way than to circulate gold again, which in a first step could be done by authorizing central banks to exchange gold among themselves on the basis of the free market price of about $68 an ounce.

—From Le Monde (Paris).

* * *

The Europeans are no longer so certain that they won a monetary victory. Adding to that of December 1971, the second devaluation of the dollar might rather rapidly produce the effects the first one could not produce: a reflow of capital toward America and above all, an incomparable exchange advantage for American exports. It is thus too late to fear a trade war. The trade war has already begun.

—From Combat (Paris).

Kissinger in Peking

Henry A. Kissinger's more or less regular visits to China indicate not only a progressive détente between Washington and Peking, but beyond that a new political constellation in Asia which does not appear to accord with pessimistic predictions about the "post-Vietnam" era. Although there cannot be any talk of an alliance as yet, there are signs of a more intensive interplay between America and China, something that would have seemed impossible only a short time ago but could create a new situation in the near future, and not only in Asia.

—From Neue Zuercher Zeitung (Zurich).

Wages and Politics in Britain

By Anthony Lewis

LONDON—Prime Minister Heath's anti-inflation program for Britain is patterned after President Nixon's, with a first stage of freeze followed by controls on wages and prices. But Mr. Heath faces problems of enforcement that are much more difficult, raising deeper social and political questions.

The labor movement in the United States on the whole accepted the need for controls when Mr. Nixon moved in 1971, at first indeed cooperating in the enforcement structure. George Meany had grumpy comments, but he did not encourage any union to make extreme demands. And even before the Democratic convention last summer it was his policy to get along with Richard Nixon.

In Britain, by contrast, the unions are pledged as a body to resist any legal control of wages. Important individual unions, under militant leadership, are pressing claims above the ceilings and say they will not comply with the law. And the unions hardly want to get along with Edward Heath: They are tied to the Labor party and want the Conservatives out.

Confrontation

Gas workers are now carrying out the first confrontation. The rules laid down for stage two in the Heath policy would allow them $5.50 a week, about a 7 percent rise. They want as much as the electrical workers, who got $7.50 just before the freeze.

The gas men are carrying out a go-slow that has reduced pressure or cut service entirely in various areas of the country. There are dangers of explosions, and of misery for those dependent on gas heaters. But the gas unions say they will fight on for at least a month. By then there could be widespread hardship in this country.

Britain, as a small and centralized country, is much more vulnerable to labor trouble in essential services than the United States. Just two years ago a strike of power workers cut electricity supplies drastically. Last year there was a devastating coal strike.

Those two earlier strikes are really the reason for today's confrontation. Each was settled by massive wage increases recommended by a board of inquiry—20 percent for the mineworkers. By last fall wages were rising in Britain at an annual rate of nearly 17 percent. Mr. Heath decided that he had to swallow his proclaimed belief in the freedom of the market and impose tight controls.

No Alternative

For the same reason Mr. Heath has no real alternative to standing fast against the gas men now. If he gives way to their demand for "equity" with the electric workers, every other union will find a theory to match, and the race will be on again.

For years people have been predicting an ultimate test of strength between a British government and the country's unions. It looked near in 1969, when Labor Prime Minister Harold Wilson pushed a bill to regulate industrial relations, but Mr. Wilson collapsed and gave up his bill. Some predicted it with the coal strike a year ago, but a Conservative government retreated.

There is a lot of talk now about union challenges to the whole sense of political authority. One experienced political figure spoke privately the other day of "a smell of Weimar in the air."

But my guess is that Armageddon will be avoided once more. Britons tend to be too sensible for that. If Mr. Heath means what he says about resisting the gas workers, and others who are threatening strikes to follow, he will win. After all, he has the last political word: If things get too rough with the unions, he can call an election, campaign on the issue of who is in charge here and probably win in a landslide.

The widely-accepted belief that the Conservatives would gain from a showdown with the unions is itself an indication of changing political and social attitudes. Inflation is probably the major concern of voters today. Consumer prices have risen 17 percent in the last two years, and it is not surprising that people are frightened.

The identification of economic interests is also changing. Unions have their reasons for feeling aggrieved in a country still as class-ridden as this one. But people are noticing that militant unionism tends to push up the incomes of better-off workers at the expense of the low-paid, the weak and the retired. In short, the balance of what used to be called social justice is not so clear any more.

Mr. Heath exposed the problem when he originally tried to get the unions' agreement to a voluntary limit of $5 in wage increases this year. That would have given much greater benefits, proportionately, to the nurses and railway workers and others making low wages. The union movement said no. The legal controls now going through Parliament will be more flexible in phase two but still favor the low-paid.

The Labor party may suffer from the changing attitudes over the long term. It is wholly identified with the unions, the other day its leaders agreed with the unions that a future Labor government would freeze prices but not wages. To put it mildly, that identity of interest with the unions is unlikely to be a political attraction.

Letters

On the Horns

In the face of the excess of weary, dreary pitchmen appearing unendingly on your editorial page, it is sheer delight to see Waverley Root quibbling about the ins and outs of horns (Letters, Feb. 13). It comes out, unfortunately, that Mr. Root knows a good bit more about other things than horns. Surely the orchestral horn is at least nephew, if not son, to the hunting horn, but hardly "the same instrument minus the valves." (Horn players, arise!) Bore, metal, and mouthpiece have all undergone manifest changes since the days of the waldhorn. In a more serious inaccuracy, Mr. Root asserts that the basset horn was a tenor clarinet invented by a man named Horn. It may as well have been invented by a hound named Basset! It was invented by Mayrhofer of Passau and "basset" is simply the diminutive of bass in Italian. It was the alto, not the tenor, of the clarinet family, and its generic name "horn" undoubtedly refers to the fact that the earliest models were built in a circular form, like the horn, a characteristic shared by other members of the woodwind family whenever they were intended for outdoor use. In fact, the precursor of the modern English horn, not Mr. Root's shawm, which is an instrument of an acoustically only distantly related family, but instead an instrument very much around in the baroque era, was the oboe da caccia (hunting oboe), a tenor oboe (like the English horn) originally built in circular form for outdoor use, but brought indoors during the early 18th century and used, in fact, in that very preeminent of masterworks, Bach's "St. Matthew Passion."

DON HARMON.

Viroflay, France.

In the International Edition

Seventy-Five Years Ago

February 17, 1898

NEW YORK—The United States battleship Maine sank in Havana harbor at midnight, Tuesday, after an explosion which wrecked the forward part of the vessel, causing terrible loss of life among her crew. There were more than 400 men on board, of whom only 33, including all but two of the officers, are so far known to have escaped. The cause of the explosion which occurred on board is unknown. Spanish vessels in the harbor aided in rescuing the wounded.

Fifty Years Ago

February 17, 1923

NEW YORK—Canada is taking very intelligent steps to attract the best class of immigrants. Australia and South Africa are aroused to the necessity of increasing their productive population. France deplores the annual decrease in her birthrate. But it is quite remarkable that at the same time in Great Britain, a tide of Malthusian sentiment, with the logical corollary, the prevention of a too rapid increase, is on the rise and many leading papers support it.

Athens Students, Police Clash As Protests Enter 4th Week

ATHENS, Feb. 16 (AP).—Student unrest entered its fourth week today as Athens University students, protesting a decree suspending their draft deferment, clashed with police in downtown Athens.

Unconfirmed reports said that about 100 arrests were made and a score of students injured by police in the skirmishes.

About 1,200 students from Athens University's School of Law met at the Law Building to protest government intimidation stemming from a law passed Monday suspending deferment from the draft if cited for any infractions by university authorities. The students are also demanding greater say in student affairs and reforms in university administration.

Chanting "democracy" and "freedom" and singing banned songs of exiled composer Mikis Theodorakis, students waved Greek flags from the open windows of the building and taunted police in the streets below.

Assured by Dean

As scores of students attempted to leave the Law Building peacefully after being given assurances from the school's dean, police moved in and clashed with the students.

The government claimed that "only a handful of extremist students" are involved in the unrest and that they are taking orders from the outlawed Greek Communist party.

Yesterday, the government announced that 37 students who allegedly had encouraged others to remain away from classes would be drafted into the armed forces. However, student sources claimed the figure had now reached almost 100.

The student restlessness is quickly spreading to other universities in Greece. It is considered the first real challenge to the army-backed government's authoritarian rule since the 1967 coup when the army seized power and suspended democracy.

Sentence Is Doubled

ATHENS, Feb. 16 (UPI).—A military court today more than doubled the prison term of Stathis Panagoulis, an opponent of the regime and brother of the man who tried to assassinate Greek Premier George Papadopoulos.

The five-member court convicted Mr. Panagoulis, 27, of draft dodging and sentenced him to four years and 10 months in prison. This was in addition to a 4 1/2-year jail sentence imposed on Mr. Panagoulis by another court last month on charges of trying to free his brother Alexandros from a military prison. Alexandros has been held since he tried to assassinate Mr. Papadopoulos with a bomb in 1968.

Mintoff Accepts NATO Payment Of Rent Increase

VALETTA, Malta, Feb. 16 (UPI).—Premier Dom Mintoff today accepted the offer of five NATO members to make up two-thirds of the extra rent he demands for Britain's base on this strategic island.

In a note, which he handed to British High Commissioner John Moreton, Mr. Mintoff agreed to the £800,000 compensation offered for the drop in value of the floating pound.

Britain, in turn, paid its rent installment of £3.5 million, which Mr. Mintoff had refused on Jan. 1 because it did not include a 10 percent increase.

The Anglo-Maltese defense agreement signed last March provided for rental of £14 million a year.

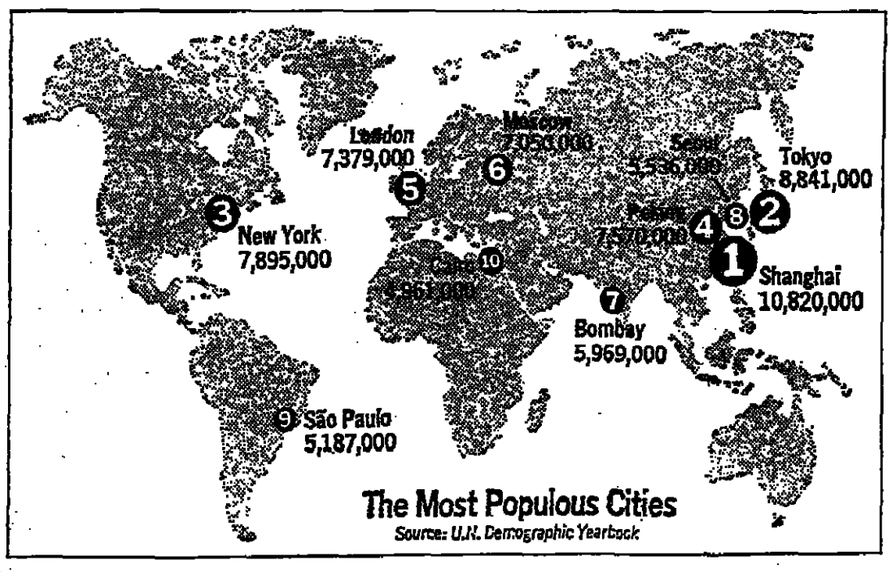

Britain refused to increase its rent, which already had been increased in the new agreement, but the United States, Italy, West Germany, Belgium and the Netherlands offered to increase their contributions by the 10 percent they had saved with the devaluation of the pound—roughly three-quarters of what Mr. Mintoff asked.

Cox Had Heart Attack

HOLLYWOOD, Feb. 16 (UPI).—An autopsy showed today that Wally Cox, television's "Mr. Peepers," died of a heart attack yesterday at the age of 48.

Storm Lashes Spain

MADRID, Feb. 16 (Reuters).—Racing seas with waves reaching 60 feet lashed Spain's northern coast today while heavy snowfalls covered most inland areas, including parts of the south, weather officials said.

Tokyo Is Second; New York, Third

Shanghai Heads UN List of Largest Cities

By Kathleen Teltsch

UNITED NATIONS, N.Y., Feb. 16 (NYT).—Shanghai has moved into first place as the world's most populous city, outstripping Tokyo and New York.

The Chinese city was given the top position in the UN demographic yearbook, published this week, containing the first official figures from mainland China in more than a decade.

The demographers gave front rank to Shanghai on the basis of the latest data, which showed Shanghai in 1970 with a population of 10,820,000, followed by Tokyo with 8,841,000 and New York City with 7,895,000. The total for New York was limited to the five boroughs of Queens, Brooklyn, Manhattan, Staten Island and the Bronx, and did not include the suburbs.

On the basis of the latest figures from China, demographers classified Peking, with a population of 7,570,000, as the fourth largest city in the world. Next, the yearbook listed London, Moscow, Bombay, Seoul, Sao Paulo and Cairo.

Past editions of the yearbook had showed Tokyo and New York in close contention for first place, but the statistics for Shanghai were based on 1957 data. Official Chinese figures were not available in the late 1950s or during the 1960s.

The newer figures on China were taken from official publications brought back by a UN official from a visit to China. Although Peking was seated in the UN in October, 1971, it has not yet supplied demographic data directly to the world organization.

The yearbook figures on population, together with information from other sources, show Shanghai with a population density of 36,000 persons to the square mile. Tokyo, covering a smaller area, has a density of 39,680 persons per square mile. New York has a density average of 26,340 per square mile.

Demographers regard density statistics as an indicator of the quality of life. The statistics do not show, however, such facts as how many persons living outside a city pour into it daily during working hours or what forms of transit they use.

814 Pages

The UN yearbook, published since 1948, is regarded as the world's most comprehensive compilation of demographic data. The new 814-page edition emphasizes population and vital statistics obtained in censuses in 1970 and 1971.

The yearbook reported that world population reached 3.706 billion in mid-1971 and said that if the annual growth of 2 percent was maintained, the population would double by the year 2006.

China, the world's most populous country, had 737,176,000 persons and India was in second place with 550,374,000, according to the yearbook, which estimated that one of every two persons in the world is an Asian. The yearbook said 2.104 billion persons lived in Asia, 56.7 percent of the world total.

The yearbook also shows a continuing downward trend in much of the world in infant-mortality rates—regarded by demographers as a good indicator of general health and welfare.

U.S. Is 22d

The Netherlands and Sweden have the lowest infant-mortality rates—11.1 deaths per 1,000 live births. Low infant-mortality rates were reported for Finland, 11.8; Japan, 12.4; and Iceland, Norway, Denmark and France. The United States ranked 22d in the listing with 19.2 deaths per 1,000 births.

The yearbook showed the infant-mortality rate for South Africa's white population as 19.4 and for the nonwhite population as 121.3.

West Germany reported the lowest birth rate in the world—12.8 births per 1,000 population.

Nigeria, Upper Volta, Sri Lanka (formerly Ceylon), India, Cambodia, Jordan and Pakistan were the only countries listed where men have a longer life expectancy than women.

Obituaries

Georg Duckwitz, Helped to Save 5,000 Jews

BREMEN, West Germany, Feb. 16 (Reuters).—Georg Ferdinand Duckwitz, 68, who as an official in Germany's wartime embassy in Copenhagen helped save thousands of Danish Jews from Nazi death camps, died here today.

Mr. Duckwitz's humanitarian efforts were recognized by Denmark after the war, and, in 1953, King Frederick IX bestowed on him the Knight's Cross of the Daneborg Order. The Jewish community in Berlin awarded him the 1970 Heinrich Stahl Prize in similar recognition.

Mr. Duckwitz continued in government service after the postwar division of Germany. As a special negotiator he played a large part in working out the terms of the historic West German-Polish treaty of reconciliation, in which Bonn finally recognized the Oder-Neisse line as Poland's western border.

In 1928, the firm of Roselius sent Mr. Duckwitz as its representative to Copenhagen. Later he worked for the Hamburg-America shipping line.

The Nazi German Foreign Ministry claimed his services as a shipping expert in 1939 and posted him to its embassy in Copenhagen.

Hitler Policy Opposed

Mr. Duckwitz actively opposed Hitler's policy of force toward Denmark. He established contacts with Swedish Minister of State Per Albin Hansson and with Danish resistance leaders Hans Hedtoft and H. C. Hansen.

The channels he opened were largely responsible for the existence of the Nazi death camps becoming known. As a result, more than 5,000 Danish Jews destined for arrest and deportation in 1943 were able to find safety in Sweden.

Today West German Chancellor Willy Brandt lauded Mr. Duckwitz's qualities. He told Mr. Duckwitz's Swiss-born widow, Annemarie, that her husband "through his courage and his steadiness in difficult times helped in an exemplary manner to modify the image of the Germans."

Georg Ferdinand Duckwitz

Cranach Work Stolen From A Monastery

FLORENCE, Feb. 16 (UPI).—Thieves broke into the art gallery of a suburban monastery yesterday and made away with nine valuable paintings, including one by German 16th-century master Lucas Cranach, police said.

The paintings were stolen from the Certosa del Galluzzo, a Carthusian monastery just outside Florence. Experts estimated their value at hundreds of thousands of dollars.

Monks said that the Cranach work was a Madonna and Child done in 1514. It measures 30 by 38 inches. Other stolen paintings included canvas replicas of frescoes by Nicola Pontormo adorning the walls of the monastery.

Bonn Chooses Envoy to U.S.

BONN, Feb. 16 (AP).—Berndt von Staden will be the new West German ambassador in Washington, the Foreign Ministry announced today.

Mr. von Staden, 53, head of the Political Section of the Foreign Ministry since 1970, earlier served for five years in Washington as embassy counselor.

He is a former lawyer who was born in what is now East Germany. He is expected to take up his new post in the spring. He replaces Rolf Pauls, who is going to Peking in April as West Germany's first ambassador to China.

Tim Holt

SHAWNEE, Okla., Feb. 16 (UPI).—Tim Holt, 56, a two-fisted Western hero in 149 motion pictures, died of bone cancer yesterday in the Shawnee Medical Center.

Mr. Holt was perhaps best remembered for his role in "Treasure of Sierra Madre" and "Stagecoach." He made his last film two years ago.

Mr. Holt lived with his wife in Harrah, Okla., and worked as an advertising manager for an Oklahoma City radio station.

The son of Western film hero Jack Holt, he began his career in 1935 at the age of 18. His first screen role was to play himself in a movie about his father.

Spanish Director Dies in Steeple Fall in Filming

LA CORUNA, Spain, Feb. 16 (UPI).—Spanish film director Claudio Guerin died today after falling from a church tower while directing a scene of the film "Devil's Country," the official news agency Cifra said.

The 34-year-old director fell 30 meters from the steeple of St. Martin's Church in the village of Noya, on the coast north of this northwestern port. He died while being taken to a hospital.

A production spokesman said they would continue making the film as a homage to Mr. Guerin. "He believed his work was the best tribute," the spokesman said.

Mr. Guerin, 34, won the top prize at Spain's major film festival in San Sebastian two years ago.

Fall Kills Ballerina

YOKOHAMA, Feb. 16 (AP).—A young Soviet ballerina who was seriously injured in a fall from a ship's deck during sendoff festivities Wednesday died in a hospital today of a fractured skull, police reported.

Miss Alexandra Lichniavskiy, who was a member of the Soviet National Ballet troupe, fell six meters to the dock while trying to catch a paper tape thrown by a friend seeing her off in Yokohama.

She was to have left aboard the 5,077-ton Soviet ship Feliks Dzerzhinskiy with other members of the troupe following a tour in Japan.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

Multinational Industrial Group seeks

"TOASTMASTER GENERAL"

Company-wide Ombudsman in vast sales organization

(Marketing/Promotion Leader to represent Top Management)

The most progressive and trail-blazing organization in its field, with plants and offices and a vigorous sales team all over the world, offers this new unusual position to an outstanding executive.

We are looking for a distinguished, articulate executive with management experience and an engineering or possibly education or law background. The successful candidate should have a sincere and charismatic personality, be strongly promotion-oriented and at the same time a disciplinarian able to participate in the moulding of our worldwide field force into a homogenous group by developing a team spirit through our efforts to improve the human condition. The successful candidate will represent Top Management and act as a speaker on their behalf, handling important campaigns on new developments, particularly in several annual group conventions around the world.

Possibly executives who have not yet made the number one job through lack of opportunity may consider themselves suited to this very challenging post.

Languages: English, French and German (and others if possible).

Age: 36 to 48 years.
Top salary offered plus important bonus incentives and benefits.

Candidates with the above qualifications and of highest integrity should submit curriculum vitae and photograph to:

Box P.O. 900,541,
PUBLICITAS, CH-1002 Lausanne (Switzerland).

MECHANICAL SUPERVISOR

Large American Camera and Calculator manufacturer with branch office located in Antwerp, Belgium, is growing and seeks a person experienced in mechanical and electrical repairs of consumer products to become a Working Manager in the Service Repair Department.

Excellent career opportunity for mechanically experienced person looking for promotion to management position.

Person should speak English and it is desirable that he also speak French and/or German.

Good salary in addition to excellent company paid benefit program.

Send resumé including salary desired to:

Box 150, 8 West 40th St., 16th Floor, New York, N.Y., U.S.A.

AMERICAN INTERNATIONAL COMPANY

requires fluent bilingual English, German-speaking

FIELD REPRESENTATIVE

with background if possible in Automotive or Rubber, to travel selected West and East Europe countries. Unlimited advancement possibilities with generous salary and fringe benefits.

Send your resumé and photo to:

P.O. Box 87/M, S.P.I.,
26 Piazza in Lucina, 00186 Rome, Italy.

Personnel Manager Europe

Arthur D. Little, one of the world's largest International Consulting firms seeks an outstanding professional to manage the personnel activities of its European offices.

The man we seek will likely be 30-35 years old with an established record of accomplishment. His experience will include several years with a multi-national company with extensive involvement in Executive selection, staff development, multi-national compensation and multi-national benefit programs.

The successful candidate will be fluent in English and French; German would be valuable. Finally he will possess the intellectual capacity and social acumen required to work closely and effectively with an outstanding staff of professional management consultants.

Please submit your curriculum vitae in confidence to the Director of Personnel, International Operations

Arthur D. Little
Avenue des Arts, 56 - 1040 Brussels

DIRECTOR OF MARKETING (AEROSPACE)

A major U.S. and International Corporation in Precision Metal Manufacturing seeks a first class Marketing Director to join its European Division Management team located in London.

This is an outstanding opportunity for a man highly experienced in top level Management/Marketing in the Precision Engineering or Aeronautical field.

Of European or U.S. nationality. Graduate Aeronautical or Mechanical Engineer. A degree in Marketing or Business Administration desirable. Fluent English is a must. French and/or German desirable. Proven experience at top management level with U.S. Corporation or Multinational Company is important.

Write with full information on age, academic background, business experience, current earnings and home address and telephone number.

Box 30,589,
INTERNATIONAL HERALD TRIBUNE,
28 Great Queen Street, London, WC2B 5BE.
We guarantee all replies treated in strictest confidence.

Managing Director around $35,000

An international organization is looking for a man to head its rapidly expanding operations which are based in London.

We expect that the right person will currently be in charge of the sales and distribution of a range of heavy machinery or industrial products for a major manufacturer or distributor in Europe, Africa or the Middle-East. Probably he will be either the number two man in a multi-national operation or completely responsible for a smaller area or region. He will now be looking for an opportunity to make full use of the experience and knowledge he has gained in this area to organize and control his own worldwide operation.

The man our client is looking for will ideally be in his 30's or early 40's with a degree in engineering—but educational qualifications are less important than a combination of marketing expertize and management success. This combination is necessary since his work will involve personal contacts at the highest level of commerce and industry as well as the direction of a widely dispersed sales and service organization.

Our client will negotiate a salary around $35,000 for the right man.

JWT

Applications, which should give full details will be acknowledged and forwarded to our client. They should be addressed to:—

JWT Recruitment (MD/HT),
J. Walter Thompson Co. Ltd.,
40, Berkeley Square,
London W1X 6AD.
ENGLAND.

CATHAY PACIFIC AIRWAYS
HONG KONG

IN-FLIGHT SERVICE INSPECTOR

Cathay Pacific Airways—a member of the Swire Group of Companies—has a vacancy for an in-flight service inspector to be based in Hong Kong:
Age 32 to 38 years.
Experience: At least ten years with a major international airline as operating cabin crew, conversant with all aspects of in flight service. Some administrative experience and ability to lead and control a large multi-racial staff.
Previous hotel background would be an advantage.
The successful applicant will be required to travel frequently in the course of his duties, and must possess the ability to train senior cabin attendants to the rank of check cabin attendant. He should be capable in due course of assuming the responsibilities of a senior management post within the passenger services department of the company.
Salary according to age and experience but total emoluments for a married man will be not less than 5,730 pounds per annum at current rates of exchange.
The post will qualify for 6 weeks' annual leave with passages paid, other benefits include children's education allowances, staff provident fund, and medical benefits. Hong Kong salaries tax is presently a maximum of 15% of gross salary.

Applications stating age and full details of experience should be sent to:

John Swire & Sons Ltd.,
66 Cannon Street, London, EC4N 6AJ,
marking envelope "C.P.A. Vacancy."

EXECUTIVES AVAILABLE

MBA
Young Dutchman, graduate American Business School, many years experience sales, marketing and finance, fluent English, German and French, seeks more challenging position with international company.

European Galleries

Rome

American Hyperrealists. Medusa. 124 Via del Babuino, Rome, through February.

The paintings of the photorealists look like nothing so much as self-portraits of cars. Vehicles, airports and other man-made contraptions, smooth and cold, lie as if embalmed in varnish-yellow lighting. Lack of receding perspective or any trace of paint stroke by a human hand make for a mechanical blandness.

Interviews with photorealists in the December issue of Art in America, among them Don Eddy, Richard Estes, Ralph Goings, Duane Hanson, Richard McLean, David Parrish and John Salt, whose work is now on exhibition in Rome, revealed that most had been abstract painters to start with and all admitted a debt to pop art. The difficult freedom of abstract expressionism and its emotionalism, the camp and wit of pop, had exasperated them, and so they earnestly turned around and plunged into "reality."

All, aided by their own head-on photographs of their subjects, limit themselves to a moment snatched from disturbing and changing reality, shielding themselves from interference of daily life so they can devote themselves to work and finish alone. Like all new converts afraid of lapsing, they stick closely to their chosen line and are particularly careful not to appear emotional or amusing. This, and the plodding technique (the canvases aim for the airbrushed look of products from an advertising office showcase) make for an exaggerated placidity.

No wind ruffles the smooth surfaces, no smudges or garbage obtrude between cars and their reflections in shop windows, and the few humans and other organic life depicted are frozen. What then is this true-to-life reality?

Here, Estes is an exception. His 1968 "Bus Window" is painterly and actually consists of brush marks. His small recent "Grant's" on cardboard has a live jewel-like glow.

Hanson's gruesome dummy called "Rocker" is the conversation piece of the exhibition. Although it is strictly speaking what is now called a "verist sculpture," the work brings out the most negative characteristics of the whole trend. Looking like an undertaker's experiment, instead of making the idea of a Hell's Angel repellent, it is repulsive itself. There is no transformation.

The photorealists' obsession with surface, with inanimate Detroit - made artifacts, their secondhand vision, their exploitation of their own and the public's temporary disenchantment with the immediate past and, despite all declarations to the contrary, their heavy sentimentalism will eventually be self - defeating. Once the novelty has worn off, these huge renderings, like Victorian potboilers before them, will become period pieces.

Valentino Vago. Qui Arte Contemporanea, 535 Via del Corso, Rome, until Feb. 20.

Luminous grounds of pearly gray, lemon or soot black are defined by firm accents: staves, swirls, little plus and minus signs, in Vago's sensitive abstractions. Opalescences, spatial depth against linear play, convey a sense of subtle balance and mellowness.

Rockwell, Leavy, Ziegler, Moskowitz, USIS, 2 Via Boncompagni, Rome, until March 2.

Peter Rockwell's bronzes have always been a tribute to the small joys of everyday life, and here a group of sturdy figures in fresh, vivid poses, confirm this again. But now, beyond this Rockwell has translated spiritual ideas into tangible sculptural compositions. His finely branched symmetric bowers or cruciform structures allude to the phenomena of faith and myths.

Portraits and Roman views by John Leavy in subdued blues and tans are traditional, and Laura Ziegler's lifelike portraits and other terracottas and bronzes are amusing genre pieces, while Shirley Moskowitz's sprightly watercolors and drawings are recording her sojourn in Italy.

Margherita Benetti, Retrospective, Marine, 43 Piazza Navona, Rome, through February.

Benetti, who showed recent work not along ago (IHT Nov. 25, 1972) now exhibits her oeuvre since 1957. Like very few printmakers today, she etches, inks and prints by herself in her own studio. Her solitary strength and imagination, the range from her early views of the fog-shrouded poplar plantations of her native Po Valley to the somber beauty of her new abstractions, is quite unusual.

Charmion von Wiegand, Vigo, 1 Via Principessa Clotilde, Rome, until Feb. 20.

Von Wiegand, one of the earliest abstractionists in America and friend and admirer of Mondrian's, translated this master's severe serenity into a modified pretty expression of her own. Some older paintings in this vein, in clear colors, are on view. But they are overshadowed by elaborate mandalas with fussy detail which were painted after a new adherence to Oriental philosophy.

—EDITH SCHLOSS.

Paris

Alvarez, Galerie Dina Vierny, 36 Rue Jacob, Paris 6, to Feb. 25.

"Grant's" by Richard Estes on view at Medusa Gallery, Rome.

Two environments by Domingo Alvarez—two rooms with mirrored walls, floors and ceilings, and with luminous colored inlays in the glass. Standing inside them one sees surrounding space mirrored away into infinity, above, below and all around.

Bissière, Galerie Jeanne Bucher, 53 Rue de Seine, Paris 6, to Feb. 24.

Roger Bissière, who died in 1964, was a modest artist who remained true to his own style throughout his life. The present exhibition is devoted to small works, drawings, lithographs, watercolors, and wax, tempera and oil paintings, characterized mostly by a preference for two-dimensional patterns.

Fromanger, Galerie 9, 9 Rue des Beaux-Arts, Paris 6, to Feb. 28.

Gérard Fromanger uses the syntax of the language of posters to make an impersonal, cumulative political commentary. The show is titled: The painter and his model. The painter is the invariable black silhouette of Fromanger himself in the foreground of each painting, the model is a variety of merchandise in store windows. One of the paintings shows the gallery where the exhibition is taking place with one of Fromanger's paintings in the window. The works are derived from photographs and the approach to color is thoroughly simplified.

Degobert, Galerie Mathias Fels, 138 Boulevard Haussmann, Paris 8, to Feb. 28.

Degobert's work is at midpoint between trompe-l'oeil and hyperrealism. Oversized cookie boxes sugar-loaves and ordinary objects displayed together on a white surface and carefully depicted.

Holley Chirot, Galerie Marie-France Bourely, 68 Rue Mazarine, Paris 6, to March 1.

The imaginary world of American engraver Holley Chirot is one of slow, disquieting dreams. They are expressed in careful and precise images in color and in black and white. Animals and strange structures stand, float or stretch (like Alice's serpentine neck) in a land where nobody is ever sure which way is up. An original and intimate quality.

MICHAEL GIBSON.

THE ART MARKET

What Happens When Speculators Stay Away

By Souren Melikian

LONDON, Feb. 16 (IHT).—How does the art market react to monetary chaos? Sometimes, it doesn't, as seemed to be the case at Christie's auction of Oriental art in London Tuesday.

The reason is not difficult to discover: Some art market categories do not lend themselves to speculation. Among them are certain "difficult" categories, requiring a high degree of expertise if the buyer has any hope of avoiding blunders. Sales in these categories hold little interest for the speculator.

Christie's auction consisted of objects from two categories: The first was comprised of objects from India, Tibet and Thailand; the second, of Persian work. The first category is healthy, characterized by fairly large supplies and an even greater demand. The second is sick—the market has been swamped with fakes to the point where few private collectors remain in the field. In the first category, even bad pieces of late period and inferior workmanship sell well. In the second, even good pieces go unnoticed and fetch low prices.

This basic pattern remained unchanged at Christie's Tuesday.

One of the more interesting groups in the sale was of Burmese sculpture which rarely is seen in the West. It is said that those objects which do find their way West are smuggled across the north-eastern border of Thailand. Three years ago, a series of remarkable wood carvings, gilded and inlaid with glass, appeared in France in the dealers' market. The prices varied from 20,000 to 30,000 francs. The best in the series was acquired by the Musée Guimet for 80,000 francs. Little more of this sort of work has been seen since, which made Christie's pieces all the more interesting.

Since Burmese art is not very well known in the West, dating and determining exactly where objects were made—the country is vast—are difficult. But the pieces at Christie's had obviously come from a different place, and probably a different time, than those seen in France three years ago.

A lacquered bronze figure of Buddha, seated on a tiered throne, 27.5 centimeters high, was said, in the catalogue, to be 19th century. It could well have been much earlier and was of very fine quality indeed. A London dealer paid £63 for it.

Thai works, as usual, sold well. The best piece was probably a gilt-bronze image of Pra Malai visiting hell. The monk stands with a gourd slung over his shoulder looking down at the heads of his former acquaintances lying in a bowl. They are about to be devoured by the beasts of hell, while a human skeleton, lying on the base below, is being eaten by an armadillo. This piece, somewhat reminiscent of 15th-century German art with its obsession with death, was of high quality but of late period. The story of the Monk Pra Malai was written in the 18th century. The price for this work, which has a parallel in the Rietberg Museum, Zurich, was £95.

The highest bids, however, were made for the later pieces. Aesthetically, they could hardly be more hideous. The big 61-centimeter-high, seated Buddha of gilt and lacquered bronze which was knocked down at £273 was the kind of thing that British colonials of the mid-19th century thought tremendously impressive. The high price, in keeping with those at several recent sales in London, is an interesting sidelight to the fad for Victorians. Not only are the British reviving the taste for Victorian objets d'art, they are also accepting the Victorian vision of foreign art—in this case, of Oriental art.

In the Persian part of the sale, it was significant that good and bad pieces fetched more or less the same prices.

Among the good pieces was a lusterware bottle from central Iran, made during the first quarter of the 13th century. It was flawless—rare for fragile excavated pottery. The price was £180. There were far lower ones. A bronze bowl from the early 16th century, 26 centimeters in diameter, went for £57. Disturbed by some unusual features, the author of the catalogue had declared it to be "in the 15th-century style but of 18th-century date." This prudence is typical of the atmosphere of distrust in the market.

The Persian sale was thus completely unaffected by the monetary crisis. Silver may rise in price or jewelry, but not objects surrounded by controversy. While prices for the Far Eastern carvings, all of average quality, were "high," as usual, these are the sorts of things sought after by the average collector with limited means—hardly glamorous enough to attract speculation.

Metropolitan's Basement Offers Few Bargains to Art Collectors

NEW YORK, Feb. 16 (AP).—The Metropolitan Museum of Art cleaned out its basement and gave 146 paintings to the Sotheby-Parke Bernet Gallery to auction. It was advertised as a poor man's old masters' auction. Hundreds crammed into the gallery yesterday—but it wasn't bargain day after all.

The 146 paintings, most of them belonging to "the school of . . ." or done "in the manner of . . ." plus a group of once-scorned 19th-century landscapes and portraits, were sold for a total of $467,875, $100,000 more than the gallery had expected.

There were few bargains. A head of a cherub "in the manner of Correggio" and once owned by Cornelius Vanderbilt, was among them at $475. So was "Two Men Working at a Brazier," attributed to the 17th-century Flemish school, at $450.

But a small triptych attributed to Francesco di Vannuccio went for $25,000, $21,000 more than the presale estimate.

A Di Giovanni "Madonna and Child," also estimated at $4,000, went for $21,000. A Corot landscape with three ladies leaning on a fallen tree went for $23,000, $8,000 above the highest estimate. The buyer was a Liechtenstein dealer.

Other high prices were the $18,000 paid by an Italian dealer for an "Annunciation" attributed to the school of Filippino Lippi (high estimate, $3,000) and $15,000 for another "Annunciation" of the Florentine school, circa 1460 (high estimate, $3,000).

According to a gallery spokesman, the sale proved that the prices on old masters and 19th-century paintings, which have been going up for the past year or so, are still going up. "They've been undervalued for some time," he added.

5,000 Years Of Carving In Russia

By Michael Gibson

ARIS, Feb. 16 (IHT).—The Franco-Soviet cultural agreeit has brought to Paris a real el of an exhibition devoted 5,000 years of wood sculpture Russia (Grand Palais, to April

Some 350 items barely skim surface of what is to be nd in Russia itself, but they e the visitor an inkling of At remains for him to diser in Sovict museums.

he picture one gets is necesly fragmentary and yet there signs of an extraordinary tinuity in popular traditions. is, as early as the third milnium BC, ladies were being ved in the shape of waterl, a motive which has reined in use down to modern es.

he Scythians of the Altaic ion (5th and 4th centuries favored animal sculptures in and high relief and their rk shows both a remarkable se of observation and an outnding ability to combine this ervation with a stylization of ms. Griffins, tigers, elk and gs are represented in small ptures used mainly as harss decoration. It is hard to how much the Scythian work luenced the artisans of subquent centuries, but obviously rural wood carver will always tempted to represent animals d vegetation when he needs decorative motif.

Byzantium naturally influenced e religious art of Russia. The thodox clergy did not really or sculpture, which was felt be too heathen or too Catho- but sculpture flourished noneeless. The canons of Byzane mosaics found a three-dinsional transposition in this rt of work, no doubt the least familiar of the whole exhibion. But one also discovers anher temper in the Russian rk: something weighty, masve, solemn, round and slowoving, reflecting the processional mood, the cosmic dance the priests within the church something both intimate and arfully imposing that expresses he Divine Father figure, both ender and weighted with imlacable authority. The Westrn religious mood rarely car-

Wood figure of a Russian saint, late 1700s to early 1800s.

ries such connotations of intimate tragedy.

The 17th and 18th centuries saw the development of a Russian baroque, derived from contacts with the Italian style as well as from the proximity of Catholic Poland. Peter the Great, opening the door to the West, was, in a sense, the prime cause of this mutation. But the imported style developed well only around the capital. The countryside beyond rejected it and turned to its own undercurrents of myths and forms.

Popular belief, or more precisely the popular imagination, has some of the characteristics of a stew in which all the ingredients, the earliest and the most recent, communicate their flavor to one another. The forest deities of the pagan past survived deep into the era of Christ and his saints, and a traveler going through the woods might well encounter a rough-hewn wooden idol, flat-faced as the Cycladic gods, dressed in multicolored rags.

But it is in the section devoted to decorative sculpture and everyday objects that one discovers the basic qualities of the Russian artisan, a vigorous enthusiasm and inventiveness. Here we find displayed the household furnishings of a 19th-century isba, the decorative panels of churches with grinning angels and beasts, the splendid, inelegant, powerful church pillars carved out of whole trees, the sun's face that once crowned the masts of ships that sailed the Volga, or the two tub-shaped beehives imagined by a 19th-century artisan with an old woman and an old man carved upon them in relief, the eyes and mouth being the holes through which the bees came and went.

According to the opinions propagated by the Fine Arts Academy of Saint Petersburg, works in marble and in bronze were sculptures—all others were unworthy of notice. This sort of scorn for an authentic national art form no doubt allowed much to be destroyed that might otherwise have been preserved. At the same time the popular woodcarvers were thus spared the missionary zeal of the academic world that tirelessly kills the roots of whatever it chooses to admire.

The weakness of the modern woodcarvers represented in this show illustrates what I mean. In former times the craftsman worked in a tangible environment. He made objects for people he knew or in relation to functions with which he was familiar. Today's carver is trying to produce a significant statement. But the value of past works resides precisely in the fact that they are not intended as significant statements about anything.

LONDON THEATER

Theatre Workshop Marks 20th Anniversary

By John Walker

LONDON, Feb. 16 (IHT).—This year marks the 20th anniversary of Joan Littlewood's Theatre Workshop—for which much thanks to her and the theater's dauntless general manager Gerry Raffles—and the occasion is currently being celebrated not only by the latest production at Stratford, Ken Hill's farcical "Is Your Doctor Really Necessary?" but also a ghost of Theatre Workshop past, Shelagh Delaney's "A Taste of Honey," which has been revived at the Young Vic.

Theatre Workshop hasn't changed much in the last decade or so, which is no bad thing. It is still alive and kicking, if not completely well. Certainly, Mr. Hill's play is not going to become part of a dramatic revolution, or take London by storm and become a West End hit, as "A Taste of Honey" once did. That, in itself, is no criticism of the production although there are indications that, these days, Theatre Workshop is not interested in storming barricades, is happy to settle for second-best with productions that are warm and enjoyable, but rather comforting and cozy—and slap-dash in style and execution.

There used to be a feeling about a Theatre Workshop play that the actors had rewritten their lines or were busily improvising, creating something fresh. Now they rely on familiar bits of business—the actors, for the most part, are rigidly typecast in production after production—and display no interest in their text whatsoever. There was an ominous moment, during a crucial scene of "Is Your Doctor Really Necessary?" when one actor dried up and then stumbled over his lines and no one seemed capable of helping him.

Mr. Hill's play is a collection of medical jokes loosely tied into a plot that resembles Peter Barnes's "The Ruling Class" with its gentle Messiah-figure turned by an approving society into Jack the Ripper. Here we have a doctor, who claims to be Jesus and cures by faith, inheriting a large drug firm and being manipulated by politicians, doctors and businessmen until he is transformed, by electric shock treatment, into a pill-prescribing, aspirin-chewing charlatan.

The play itself undergoes a similar change. On the page, it must read like a vitriolic attack on drug companies and the whole mystique of medicine. Says a drug firm spokesman: "We are in the business of mercy. Note the importance of that word, gentlemen: business!" The leaders of the medical profession are shown as money-grubbing hypocrites, members of the General Medical Council appear dressed as Ku Klux Klansmen, and the minister of health is concerned with playing golf and insuring that disease remains at a respectable level.

But, in production, it becomes a music hall romp. As Mr. Hill also directs, he only has himself to blame for the way he undermines his arguments by irrelevant jokes. His hippy doctor hero can hardly be taken seriously when as a cure for ulcers we see him offering a machine gun to a patient so that he can shoot at a cardbord effigy of his nagging wife. The references to Thalidomide and Buchenwald presumably indicate that Mr. Hill wants to be taken seriously.

His emphasis is on knockabout farce, with patients trying new drugs and suddenly losing limbs ("Hello, side-effects already") and no opportunity missed for a dirty joke ("Take these pills four times a day after intercourse"). There are songs too—bright numbers written by Tony Macauley—that have no relevance to the show at all, but are there merely to give Theatre Workshop's resident beauties, Toni Palmer, Diane Langton and Valerie Walsh, a chance to shake, shimmy, bump and grind. The cast works hard. Some play four parts and Maxwell Shaw, Brian Murphy, Avis Bunnage and Ron Hackett (as a psychiatrist with a tendency to lycanthropy) continue to delight. The show is scurrilous, scoffing, sometimes ridiculous and always unfair to doctors. I enjoyed it; but, then, I'm healthy.

Shelagh Delaney's "A Taste of Honey" was first produced at Theatre Workshop in 1958, when the author was 19. It is a thin piece which seems worse than it is in Pam Brighton's revival at the Young Vic.

In outline, it approaches a parody of working-class theater: a feckless mother abandons her 18-year-old illegitimate daughter for a man much younger than herself. The daughter has a brief affair with a black sailor, becomes pregnant, and is cared for by a shy homosexual art student until her mother, rejected, returns just as the baby is about to be born.

Its value lies in the two contrasting relationships, between the girl, Jo, and her mother—a harsh, sarcastic, bitter duel between two similar people—and between Jo and Geoff, the student who has a capacity for selfless love and little opportunity to display it. These still work, due mainly to Julia McCarthy's brash mother and Jeremy James-Taylor's delicate performance as Geoff. Jane Wood, as Jo, is a little too much an amalgam of kooky mannerisms to be at all moving.

Pam Brighton has added a number of songs, which do nothing but hold up the action. In two cases, a dream sequence with Peter Straker singing—well enough—"Help Me Make It Through the Night" under blue lighting, and Jo and Geoff dueting on "Sisters," they provide a fair measure of embarrassment. She has also updated the play. In which case, she might at least have knocked a few years off Jo's age. Are there still girls of 18 today who are ignorant as Jo? As incapable of looking after themselves? As determined to have an unwanted child?

At the Almost Free Theatre, at lunchtime, Mustapha Matura's "Nice" is a thin monologue well delivered by Stefan Kalipha about an anxious-to-please immigrant who achieves first prosperity and then prison.

20 Impressionist Works Donated To Paris Museum

PARIS, Feb. 16 (UPI).—Paris art dealer Max Kaganovitch has donated 20 impressionist works to the Jeu de Paume museum, the Réunion des Musées Nationaux announced today.

The collection, praised by art critics as "of exceptional importance and first quality," includes paintings by Cézanne, Renoir, Pissarro, Sisley, Monet, Gauguin, Van Gogh, Seurat, Boudin, Daumier, Courbet, Corot, Bonnard, Vlaminck and Derain.

The agreement, signed yesterday by the dealer and museum representatives, said that the paintings first will tour French cities, then go to Moscow, where Mr. Kaganovitch was born, and later to Jerusalem if peace is re-established in the Middle East. Then they will go on permanent display in a room named after Mr. Kaganovitch and his late wife at the Jeu de Paume.

Dollar Gains in Europe, But Worries Persist

By John Fiehn

FRANKFURT, Feb. 16 (AP-DJ).—The dollar performed strongly on major foreign exchange markets today, but still disappointed some who expected it to be even firmer after its 10 percent devaluation.

The Bundesbank had hoped that the dollar would quickly reach its new ceiling price of 3.9656 deutsche marks, allowing the central bank to feed into the market some of the 6 billion unwanted dollars it received prior to the devaluation.

On most major markets, the devalued dollar moved steadily between its new central rates and mandatory upper intervention points during the week.

In Frankfurt, the dollar closed today at 2.96 DM, up from 2.95 yesterday.

Despite statements from monetary officials that the devaluation restored order to the markets, bankers tend to discard these statements as "too euphoric." The consensus among most of these experts is that it needs only a spark to set markets afire again.

Any hints that Japan may revalue the yen more than expected could be such a spark, these experts say.

Uneasiness also prevails on what Switzerland will do with its floating franc. There is some speculation that the Swiss may repeg it over the weekend with a 5 percent revaluation.

The future of the pound also causes some concern to bankers. They argue that sterling, closing today at $2.438, is effectively devalued 17 percent against leading EEC currencies.

"It had been generally accepted prior to the last crisis that France wouldn't tolerate a sterling devaluation in excess of 10 percent," one banker argued.

France appears inactivated by its national elections in early March and some bankers fear that after the election, it may devalue the franc.

There is also fear that Italy might devalue the lira 5 percent against the devalued dollar, or at least follow the dollar devaluation once it repegs its floating currency.

The week's surge in the free market gold price did not seem to alarm foreign exchange and gold dealers. Sharp rises in gold are often considered warning signs of monetary instability ahead. However, gold dealers in Zurich and Frankfurt claimed that in effect, the gold price surge was simply reflecting the dollar devaluation.

Spain Revalues Peseta

MADRID, Feb. 16 (AP-DJ).—Spain revalued the peseta by 10 percent today by maintaining the gold parity of the peseta. The new dollar parity will be 58.02 pesetas, compared to 64.47 before the dollar devaluation.

Negative Interest Rate Eyed

FRANKFURT, Feb. 16 (Reuters).—Deutsche Bank told its customers today that it reserves the right to offset any extra costs arising from the handling of non-resident deposit accounts by imposing a charge—in effect a negative interest rate—of up to 300 deutsche marks per one million DM daily, a bank spokesman said.

He said such costs might be incurred as a result of the Bundesbank's minimum reserve requirements, under which the growth in banks' liabilities to non-residents is subject to a virtual 100 percent reserve.

For technical reasons banks may have to pay more than 100 percent of the deposit into non-interest bearing accounts with the Bundesbank.

LONDON (AP-DJ).—The late or closing interbank rates for the dollar on the major international exchanges:

Official Sees Yen Floating A Long Time

TOKYO, Feb. 16 (Reuters).—Finance Minister Kiichi Aichi said today the yen might float for a long time, perhaps months.

He told newsmen uncertainties are likely to continue in European foreign exchange markets and both Britain and Italy are expected to allow their currencies to float for a considerable period.

In these circumstances, it would be best to keep the yen floating, he said. Setting a new fixed parity at this stage might expose the yen to pressure.

Meanwhile, as Japan gradually recovered from the initial impact of the U.S. devaluation, the pressure of dollar selling subsided considerably on the foreign exchange market today. The turnover was relatively small at $51 million. The yen closed at 264.10 to the dollar, a 16.6 percent effective revaluation, after rising at one stage to 263, or 17.1 percent above the old dollar central rate of 308.

Effects Studied

TOKYO, Feb. 16 (AP-DJ).—A report from a leading securities firm predicted today that revaluation of the yen, even by a large margin, would not produce any appreciable effect on the Japanese economy in fiscal 1973, starting April 1.

The outlook from a unit of Nomura Securities offered projections based on revaluations of 15, 17, 19 and 23 percent against the dollar. It said the economic growth rate in real terms in fiscal 1973 would be 10.9 percent in case of a 15 percent revaluation and 9.2 percent for a 22 percent revaluation.

EEC Quietly Drops Plan on Tariff Cuts

BRUSSELS, Feb. 16 (AP-DJ).—EEC trade officials are quietly dropping plans, which only a minority of them supported, to unilaterally cut tariffs and raise import quotas as an anti-inflation measure.

The reason is the dollar devaluation. EEC officials believe it will have a far greater effect on the level of EEC prices than the planned 20 percent cut in tariffs on finished industrial goods would.

Average EEC tariffs are so low that even on the highest of them, the planned cut would have represented only a few percent of the price of the goods involved. Only West Germany had firmly backed the EEC commission's proposal to cut tariffs.

The plan's end became known as EEC officials began trying to assess the U.S. administration's tough new trade stance. The question is whether the toughness is mainly aimed at convincing Congress to give it the power to enter into world trade talks, or whether it is serious.

The EEC expects to get a first indication of Washington's feelings from its trade commissioner, Sir Christopher Soames, who is in Washington for long-planned talks. Similarly, the former U.S. Commerce Secretary, Peter Peterson, now touring Europe, may throw some light on the subject.

Andean Bloc Adds Member —Venezuela

BUENOS AIRES, Feb. 16 (WP).—Venezuela joined the Andean bloc for economic integration this week, greatly expanding the potential of the new six-nation pact for achieving growth through expanded markets.

Venezuelan President Rafael Caldera signed the four-year-old compact in the Andean bloc headquarters at Lima on Wednesday. Chile, Peru, Ecuador, Bolivia and Colombia are the original members.

The incorporation of relatively wealthy Venezuela should have far greater impact on the pact than Britain's joining the Common Market had there.

Venezuela's 10 million population brings the area's population to about 65 million. Most Venezuelans participate at least marginally in the consumer society that the nation's oil wealth has created. This is not true in the other more economically backward countries.

Inclusion of Venezuela could almost double the market for many area-wide industries. Its stable currency and large foreign exchange reserves are seen as a prime source of capital for the other strapped economies.

Venezuela has negotiated since the pact was conceived seven years ago to come in on terms that would not endanger its extensive but tariff-protected and high-cost industries.

Under the timetable of the pact, all tariff barriers among the six nations would disappear by 1985. Additionally, distribution of major industries is to be planned and negotiated centrally. Foreign investment, now largely from the United States, would be limited to providing new technology.

During the first years, trade among the five original members expanded rapidly. But Chile's recent balance-of-payments crisis has virtually excluded it from this trade growth.

Argentina, with greater potential as a market than Venezuela, has taken steps to associate with the Andean pact nations, though full membership is not presently contemplated.

Many geopoliticians look upon the Andean pact ultimately as a needed counterweight to the presently dynamic economic growth of Brazil—larger in area and population than the six nations combined.

FINANCIAL NEWS AND NOTES

Final Financing Plans for Fos

The French Finance Ministry has announced final financing plans for the 7.7 billion-franc steel complex being built at Fos on the Mediterranean. The figure compares with 5 billion francs initially estimated. The plan, worked out in agreement with Sté. Sollac and Sté. Usinor, the principal partners, calls for direct shareholder financing of 1 billion francs. The remainder will be made up of credits granted by the state-run Fonds de Développement Economique et Social to the extent of 2.65 billion francs, and by bank loans totaling 4.05 billion. Sollac, a subsidiary of the Wendel group, and Usinor will be equal partners but have agreed to allow, within certain limits, participation by new partners. August Thyssen-Huette of West Germany has already disclosed it is negotiating acquisition of a 5 percent interest at Fos, with an option to raise its stake up to 25 percent. The first stage of the project, involving production of 3.5 million tons of steel annually, including 3 million tons of hot-rolled wide strips, will be completed next year.

Citicorp Overseas Earnings Soar

First National City Corp. says its overseas earnings in 1972 rose 55 percent to $170 million and represented 54 percent of its after tax operating net. The bank holding company's 1972 annual report said areas contributing the major portion of the growth were Asia-Pacific, Canada and Caribbean and South America. The company, which owns First National City Bank, also took a "step toward fuller disclosure of significant financial information by revealing details of its overseas earnings and its loan loss record." Net loan losses stood at 7.5 percent of earnings for all of 1972, down from 10.7 percent in 1971 and 13.1 percent in 1970—a peak year "reflecting the liquidity crisis that took place in 1969 and persisted until 1970 following the collapse of the Penn Central."

IOS Unit to Sell Canadian Funds

Eaton Financial Services, a subsidiary of T. Eaton Co., a Toronto-based department store chain, has agreed to acquire management contracts of seven Canadian mutual funds sponsored by Lifetime Financial Services Ltd.—a subsidiary of Trans-Global Financial Services Ltd., a 77 percent owned unit of Geneva-based IOS Ltd. Shareholders of the funds, which have combined assets of some $200 million, will be asked to approve the transaction at their annual meetings in Montreal on March 15.

Time Bids for Paper Firm

Time Inc. and Temple Industries, an integrated forest products firm, have signed a memorandum of intent by which Temple would be merged into Time in a tax-free exchange of shares. Shareholders would receive one-half share of Time stock for each share of Temple stock outstanding, or about 3.1 million shares of Time stock, putting the value of the transaction at about $153 million. The transaction is subject to negotiation and execution of final agreements and approval by directors and stockholders of both companies.

Yugoslavia to Float Bond Issue in U.S.

By Dusko Doder

WASHINGTON, Feb. 16 (WP).—Yugoslavia plans to sell bonds in the United States this year to raise funds for purchases of U.S. technology, it was learned here.

It will be the first time that a Communist country has attempted to raise money on Wall Street, reflecting a new departure in the development of East-West trade and placing Yugoslavia in the vanguard of East European states seeking to expand economic cooperation with the West.

The amount of the bond issue was not known, but it may be linked to the prospective construction in Yugoslavia of an atomic power plant whose cost is estimated at more than $250 million.

U.S. Firms Interested

Westinghouse and General Electric already have entered preliminary talks with Yugoslav officials about the proposed facility. Soviet and West German firms have also expressed interest in the project.

Senior Yugoslav economic specialists, including Deputy Premier Jakov Sirotkovic, conducted a series of high-level talks here this week focusing on possible expansion of trade and economic cooperation with the United States.

Only three weeks ago, Yugoslavia became the first Communist country to sign an agreement offering American companies investing in Yugoslavia protection from such risks as nationalization, war or revolution.

Among the issues Mr. Sirotkovic discussed, according to informed sources, were:

- Yugoslavia's continued interest in U.S. technology and plans for purchases of steel processing and petrochemical facilities. Officials also expressed interest in DC-10 aircraft for JAT, the Yugoslav airline.
- Proposals for joint U.S.-Yugoslav ventures in producing and marketing goods in the third world.
- Yugoslavia's interest in long-range plans for beef exports to the United States, to be offset in part by the import of U.S. feed grains.

U.S. officials said that the Yugoslav government has implemented a vigorous economic stabilization program, accumulating a surplus of $350 million in its balance of payments in 1972 after running deficits for several years. This surplus should help to give Yugoslavia a good credit rating in U.S. financial circles.

Yugoslavia's decision to float bonds in the U.S. market, after it has received sizable credits from the Export-Import Bank, suggests that other Communist countries may follow suit once they settle outstanding financial issues with the United States.

Mitsubishi Plans to Invest Over $1.2 Billion in Brazil

By Leonard Greenwood

RIO DE JANEIRO—Mitsubishi, the giant Japanese complex that spans almost every facet of industry, plans to invest $1.2 billion in Brazil over the next five years. It will be Mitsubishi's largest investment outside Japan.

The announcement was made after 26 Mitsubishi directors now visiting Brazil outlined the investment plans to President Emilio Garrastazu Medici in Brasilia, the federal capital.

The Mitsubishi empire is made up of more than 40 firms that manufacture everything from ships and railroad rolling stock to processed foods.

Waldir Afonseca, (Brazilian vice-president of the conglomerate in Sao Paulo, said the $1.2 billion would be invested over a wide range of manufacturing fields, including shipbuilding, mining, petrochemicals, heavy industry and food processing.

He added that the $1.2 billion figure was a conservative estimate and, depending on progress and results, the actual investment by the end of the five-year period may be as much as $3 billion.

Brazil's economy has been growing at between 9 and 10 percent a year for more than four years now and the rapid expansion is continuing. One of the results is a rising flow of investment capital, now runing at about $2 billion a year.

Mitsubishi is already well established in Brazil. Investments include extensive lumber plantations in the Amazonian state of Para that are now exporting to the United States, Western Europe and Japan, the production of industrial chemicals and the distribution, though not yet the manufacture, of heavy steel products.

Controls Put on Canada Crude Oil Exports

OTTAWA, Feb. 16 (AP).—The Canadian government unexpectedly imposed controls last night on exports of crude oil, most of it flowing to the United States, and warned that Canadians may face an oil shortage next month.

Energy Minister Donald Macdonald said oil exports had temporarily been placed under National Energy Board regulation and would be continuously monitored to ensure that only surplus oil is shipped out of the country.

This meant that, effective March 1, all oil exporting must be licensed by the board. As the results of monitoring the outflow become evident, and after public hearings, the board will decide what quantities of crude oil, if any, need to be curtailed.

The announcement, which reversed a 14-year policy of encouraging crude-oil exports, was expected to have only a slight impact on present export levels.

Canada produces just over two million barrels a day of crude oil and equivalent petroleum products and U.S. imports from Canada have grown to 1.2 million barrels a day in recent months. Canada itself has been using 850,000 barrels a day from the domestic production total. But recent shortages in the United States have accelerated the flow of oil out of Canada.

Mr. Macdonald said recent export levels were "such as to strain the capacity of our oil production and transportation systems and to threaten the continuity of Canadian oil to domestic refineries dependent on such supply."

Several months ago, the board ruled that exports of natural gas to the United States must be curtailed in the interest of domestic supply.

Fed Pulls Out Stops Pumping Cash to Banks

NEW YORK, Feb. 16 (AP-DJ).—The Federal Reserve System pulled out all the stops yesterday in an attempt to pump funds into a banking network that is gasping for reserves.

In its efforts, the Fed intervened in the money market on at least four occasions, using almost all of its available tools.

The nation's money manager had cause for concern. Statistics released yesterday showed U.S. banks in the week ended Wednesday experienced the tightest reserve position on record. Furthermore, the banks had to borrow almost $2 billion from the Fed on average, the highest such borrowing since the early 1920s.

Specialists blamed the tightness and the Fed's difficulty in handling the situation chiefly on the international currency turmoil, which has had sharp disruptive effects on the flow of funds here. Also playing a role have been technical factors, including the fact that both this week and next contain banking holidays.

[Banking sources said that bank reserves were drained at least partly because of an outflow of dollars from the United States which were used to buy deutsche marks and other hard currencies in Europe, Reuters reported.]

Among developments yesterday, the Fed:

- Offered to buy Treasury bills through repurchase agreements expiring in one week.
- Placed orders to buy bills outright.
- Came back to the market to do repurchase agreements expiring in one day
- Finally, placed buy orders for any and all longer-term Treasury issues.

Under a repurchase agreement, the Fed buys securities from dealers (and their customers) who agree to buy them back later and pay a rate of interest over the period.

Purchases by the Fed inject funds into the banking network because sellers place proceeds into their commercial bank accounts.

Yesterday's actions, however, apparently were not very successful. One gauge to the availability of reserves in the banking system, rates on federal funds, continued to show tightness. Federal funds are uncommitted reserves banks lend each other.

Rates on such loans pressed as high as 7 1/4 percent yesterday and today. Until recently, the going rate had been 6 to 6 1/2 percent.

A key reason for the Fed's difficulty in injecting reserves has been the scarcity of government securities, particularly Treasury bills, in the open market.

That is because foreign central banks, which accumulated massive amounts of unwanted dollars during the currency crisis, have been investing them heavily in U.S. government securities, sharply reducing the supplies.

They were again buyers yesterday, with the Fed acting as their agent. In the past two weeks alone they have purchased more than $2.5 billion of marketable government securities. In addition, they have been buying special nonmarketable securities directly from the Treasury, also in massive amounts. This type of purchase tends to drain funds from the banking system, however. In effect, such transactions take dollars out of private hands and put them into the Treasury's coffers, outside the banking network. Specialists said these purchases could exceed $4 billion before they are completed.

Prices Climb In Surge of Late Buying

But Big Board Volume For Day Is Modest

NEW YORK, Feb. 16 (IHT).—Prices on the New York Stock Exchange gained moderately today, but trading was slow.

The Dow Jones industrial average advanced 6.10 to 979.23 after being down more than two in mid-session.

Volume totaled 13.32 million shares, compared with 13.94 million shares yesterday.

Late Buying Surge

Brokers attributed some of the late buying to the purchase of shares borrowed and sold earlier in anticipation of a decline and not yet replaced. They said there was also some satisfaction that pressure on the dollar let up abroad. But brokers added that volume was too light for the gain to be significant.

Brokers also said that many investors were inactive while waiting to see whether pressure on the dollar would resume. They also said uncertainties continued about the U.S. economy, following yesterday's report of a continuing surge in wholesale prices.

After the market closed, the government reported that industrial production rose 0.5 percent in January, following the 0.6 percent increase in December, and is 10.2 percent higher than January 1971.

Kennecott Copper, which jacked up its quarterly dividend, rose 5/8 to 27.

KLM added 1 3/8 at 35 3/4 after reporting a 16 percent increase in January traffic.

Other firm spots included Eli Lilly, up 2 1/4 to 84 3/4; Dun & Bradstreet, up 1 1/2 to 79 1/2; Fairchild Camera, ahead 2 1/4 to 64 1/4; Polaroid, up 6 to 122 3/4, and Atlantic Richfield, ahead 3 to 77.

Eastman Kodak gained 2 1/4 to 143 and Curtiss-Wright rose 1 5/8 to 39 5/8. American Motors said it made an initial payment of $350,000 when it signed a licensing agreement with Curtiss-Wright earlier this month for the Wankel engine. American Motors was unchanged at 8 1/8.

General Motors climbed 5/8 to 74 3/4; it plans over $1 billion in capital spending this year. Chrysler edged up 5/8 to 37 7/8.

Illinois Central Industries, another bright spot, advanced 1-1/2 to 49 1/2; it plans to buy up to 250,000 shares of its own common stock.

Volatile Motorola dropped 1 5/8 to 126 7/8. Honeywell fell 1 3/8 to 113 1/8. McDonald's was off 1 1/4 to 70 5/8 and Fleetwood fell 1 7/8 to 30.

Mattel, among the volume leaders, dipped 3/8 to 8 3/8. But Diamond Shamrock edged up 1/8 to 22 5/8, and American Telephone gained 1/8 to 51 1/4.

Amex Prices Slip

Prices declined in light trading on the American Stock Exchange. The Amex index dipped 0.01 to 25.40.

Rapid American warrants, the volume leader, fell 1/8 to 6 5/8.

Imperial Oil dropped to 45 1/2, but Bowmar Instrument rose 1 1/2 to 30 1/8, and Teleprompter gained 3/4 to 26 5/8.

INFLATION AND INCOME 15%

ASL (INTERNATIONAL LUX.) S.A. Luxembourg

Manufacturing chemists. Antibiotics-antiallergic cosmetics

February, 1973.

"Dear Investor,
The remarkable progress which the Companies ASL have made in recent years has continued and indeed, continued at an accelerated rate! We achieved record profits in every division of the group last year. Many new manufacturing firms in many countries are asking for our financial and technical assistance. We have a large program of expansion and we are keeping burraucracy to a very low level through continuous hard work and extensive travel.
We need more capital amounting to some millions of dollars. We invite you to invest some of your savings with us. Your investment can be a minimum of five hundred dollars and a maximum of several hundred thousands. It does not have to be in dollars as local currencies are accepted.
We specialize in mergers with pharmaceutical and agricultural feedstuff companies all over the world. Through this system, we help the local national company, the native people and we all make money. Our production is ethicals and antibiotics for human and veterinary use. Our top specialty is a antibiotic feed grade for the production of meat in 50 days. We need more capital and we invite you to contact us if you are interested in purchasing bonds. Our bonds have the following advantages:
1. A guaranteed 15% income for the first year and 18% for the second year. After two years you can convert them to shares.
2. The income is paid monthly in any desired currency and can be sent anywhere in the world.
3. The ASL-BOND may be cashed in at any time and you will receive back the full amount of your original investment.
4. The income you receive from your ASL-BOND will be tax free. Local governments are granting the taxes for our Company investments, as these are hard currency.
5. The cost of living index rose 6.8 minimum during the last twelve months all over the world. (The Financial Times Survey, December, 1972.)
6. Taking this Survey into consideration our ASL-BONDS are not offering mistrusting high income, as you have to consider 7% less inflation rate. The worldwide factories in our group are increasing prices according to the local cost of living index. It is legally permitted.
7. So it is not as high as it looks! You receive a high income and we make money too. The truth, the whole truth and nothing but the truth.

Factories in many countries! We are negotiating mergers of more factories and the purchase of mercantile ships for the transport of chemicals. Please be kind enough to write us! Thanking you in advance, we remain
Sincerely,

Dr. Paul ROHRER,
President of ASL (INTERNATIONAL) S.A."

MEXICO impulsa

can help you double or triple the interest on your investments. TRY MEXICO, where investing is EASY, SAFE and PROFITABLE.

The opportunities are great. The following are a few of the interesting investment possibilities that are available through IMPULSA.

10.6% ON BANK DEMAND & TIME DEPOSITS:
Up to 10.6% annual gross interest (or more with reinvestment) plus the benefit of 40 years without a single bank default.

10.5% ON MEXICAN GOV'T. INVESTMENTS:
Assured by the Federal and State treasuries. Eagerly sought by knowledgeable investors and bankers in the United States and Europe. Annual yields from 10.5% and up.

9% ON MEXICAN TELEPHONE CO. BONDS:
The most popular trade on the local stock exchange. Yields of 9% and more. Are purchased below par value and subject to annual raffles, where they are redeemed at par; yields can reach 20% and more.

LISTED MEXICAN STOCKS:
Blue chips often traded at P/E of 8 x.

10% ON MEXICAN MUTUAL FUNDS:
Presently paying a 10% annual dividend free of Mexican taxes.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low rangesdoes not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

How to place your portfolio under investment management starting with as little as $5,000

Here are the five simple steps you take to place your portfolio under The Danforth Associates Investment Management:

1. Write us now for a 42-page booklet describing this tested plan. There is no obligation and no one will call you. We serve clients all over the world (in at least 64 countries) solely by correspondence.

2. Study our procedures and objectives. See how we will try to help your capital grow by carefully selecting and supervising your investments in leading common stocks. Compare the 15-year "Performance Record" of all the funds we have been privileged to manage.

3. Send us a "Request Form" telling the amount of money in cash or security values you want us to manage, how you would like your dividends and fees handled, and the data we need on your own financial plans.

4. Open your own brokerage account with a large NYSE Member Firm which, for efficiency, has a special office serving only Danforth clients. Deposit your cash and/or securities in this account and give them limited power to accept instructions from us — *with all transactions to be made only in your name.*

5. From this point on, our analysts will make decisions to try to help your capital grow as fast as possible consistent with reasonable precautions. *As in any selection of investments, losses do and will occur, but* you will know their decisions promptly. You receive monthly accountings and quarterly evaluations. You can withdraw at any time.

The plan thus far has proved, we believe, especially efficient in providing capital growth supervision to portfolios starting with from $5,000 to $50,000. To take your first step now, simply write "send booklet" with your name and address and mail to Dept. X-40.

THE DANFORTH ASSOCIATES
WELLESLEY HILLS, MASS., U.S.A., 02181
Investment Management • *Incorporated* 1936

4 Weeks Dow Theory Forecasts For Only $2.00 (Reg. $8.00 Value)

For stock market investors who have not tried our weekly Advisory Service, we make this Special Introductory Offer:

1. Service each week for the next 4 weeks for only $2.00. This is an $8.00 value based on regular 3-month subscription rates;
2. Our buy-sell-hold advice on "20 Low Priced Stocks With 3 Still Under $15," our list of "6 Stocks to Split Before June 1" (companies that have publicly announced that they plan stock splits, subject to stockholder approval if necessary), and our buy-sell-hold advice on "22 Volatile Issues" such as IBM, Xerox, TelePrompTer, etc.

These are the same lists given to regular clients, and the Service will be exactly the same as received by regular clients.

Get These Investment Aids in Service

As part of the Service you will receive 27 investment aids including: (1) Stock Service Digest—a consensus of what 25 other well-known Investment Advisers are recommending; (2) Model Stock Portfolios; (3) Group Studies—shows comparative price performances of 77 industries and over 600 stocks; (4) Our Master List of Recommended Stocks; (5) Our Recommendations for Growth as well as Income; (6) Buy-Sell-Hold Recommendations on 700 Stocks and Consultation Privileges.

Full Guarantee

Your full guarantee of satisfaction applies at all times, of course. If you are dissatisfied for any reason whatsoever, your $2 will be refunded with no questions asked. Fill out and return the coupon today. (Subscription cannot be assigned without your consent.)

Dow Theory Trend Guidance

Also receive Dow Theory bull and bear market trend guidance, independent of individual stocks. Originated in 1897; interpreted by Dow Theory Forecasts since 1946.

BOOKS

THE EXILE OF JAMES JOYCE

By Hélène Cixous. Translated from French by Sally A.J. Purcell. David Lewis. 765 pp. $15.

Reviewed by Julian Moynahan

BORN in Oran, Algeria, in 1937, Hélène Cixous is professor of English at the University of Vincennes and has managed to pick up a major literary prize for her novel, "Dedans" (1969), while holding the editorship of Poétique and winning her doctorate through submission, I assume, of the French version of this astonishing, eloquent, dauntingly intelligent and philosophically learned work on Joyce to the University of Paris. Her book has received a superb translation from Sally A. J. Purcell, an Oxford graduate in French and author of a recently published volume of poetry.

The translator rises to all of the author's occasions, rendering the large outlines of her main arguments, the nuances of her detailed analyses of Joycean works, swimming strongly in the currents—torrents or cataracts, rather—of Miss Cixous's outflow of critical insights. It has been years since reading any book has so exhausted me; yet one reaches the end without meeting any sign that either author or translator has done more than hit her stride.

"The Exile of James Joyce" is itself longer than "Ulysses," which Joyce somewhere described as burning out the entire field of its preoccupations, and has the effect on me of burning out of my mind about 90 percent of the Joyce criticism that I am acquainted with. Miss Cixous knows and has read everything that Joyce knew and read, except that she does not know well enough the Ireland which irritated and tortured Joyce into "exile." But of this important proviso more later.

What does she mean by "exile"? She means that Joyce took his departure into "the world of the book," "the limitless spaces of art," and that this journey entailed the full re-creation of self and world in and through written language.

Miss Cixous's interpretations of Joyce's journey into exile not only in itself but in relation to biographical perspectives provided by Richard Ellmann, Joyce's letters, his brother Stanislaus Joyce and others, and sustained for hundreds and hundreds of pages, surely constitute some of the most distinguished critical writing on Joyce that we now have or are ever likely to get.

Part One: The Family Cell describes Joyce's peculiar dealings with his family and terminates in an account of Joyce's "cannibalizing" of his relations and relationships in his books. Part Two: Private and Public Heroism studies among other things Joyce's fascination with Parnell as the haughty Irish hero-who-falls, and analyzes his revaluation of the Jesuitical notions of sin that were part of his earliest heritage. Part Three: The Choice of Heresy centers on the "non serviam" motto of "A Portrait of the Artist as a Young Man" in its fullest implications; while Part Four: Exile as Recovery presents so exhaustive a "phenomenological" analysis of the exilic theme that there is even room for a full account of Joyce's notorious "Judas-complex" and the equally notorious topic of his farcical relations in and out of marriage with Nora née Barnacle. Part Five: Joyce's Poetics crowns all with its triumphant discussion of Joyce's handling of langua from the quasi-realism of "Si phen Hero" to the language-a solutism of "Ulysses," endi rather dubiously with a dot mystical argument that requi our believing that Leopold Blo ends a suicide.

Joyce critics tend to be part either to Stephen Dedalus or Leopold Bloom. Miss Cixous m be counted among the Steph admirers. If this causes her *exaggerate Bloom's failures a* miseries, and to ignore the e tent to which Bloom—with taste for pork kidneys, his deligi fully ecumenical attitude towa Ireland's religious sectarianis his real affection for randy Mo ly and silly Milly in Mullingar remains deeply tied to his Dub life (for the classical Ulysses a "homer" as well as a wandere she misses absolutely nothing she traces the Dedalian thei throughout the work.

Her analysis of the semi 1904 "Portrait," which Joyce ad mitted to Dana magazine a which she reprints in its enti ty, is new and essential; her e ploration of the developments Stephen's art of the prose e phany in its shift from the int ligible object to sovereign subj is rigorous; and her handling the great library scene in "Ul ses" where Stephen, expoundi his self-regarding paradoxes abo Shakespeare's art and life, pla Christ in the temple before elders, provides some of the mo illuminating pages in her book

And now for my proviso. He and there Miss Cixous displa a disfiguring ignorance of th Ireland which Joyce did not r create as a book, which goes wallowing out there in t Atlantic swell beyond the oth island. I have in mind her co temotuous references to the Eas er Rebellion of 1916 and her mi taken ideas: that Yeats wro some early poems in Irish; th Joyce's books are banned in Ir land; that Francis Sheehy-Ske fington was shot in Easter We while trying to stop rebels fro looting—he was doing first a work among wounded noncom batants, and the looters were no political Dublin poor; that t "mouth-south" rhyme appears in "Ulysses" is Joyce's own whe in fact, it is lifted from a famou lyric of Synge's. Further, wh *Miss Cixous makes shry referen* to "the obscure race that lives o potatoes" and remarks th "Joyce was frightened by the fa that the Irishman was exclud from the world because of t degenerate nature of the race, a well as by his inability sufficiently to modernize his mental world to permit him any meaningful contact with Europe," she is merely saying something wrong and stupid and must be opposed.

However, rather than initiat controversy over the comparativ states of humane culture as be tween Edwardian Dublin and Oran a half century later, shall simply aver that eve Homer, who may have been woman, nods, and that "The E ile of James Joyce" is a master piece of modern criticism.

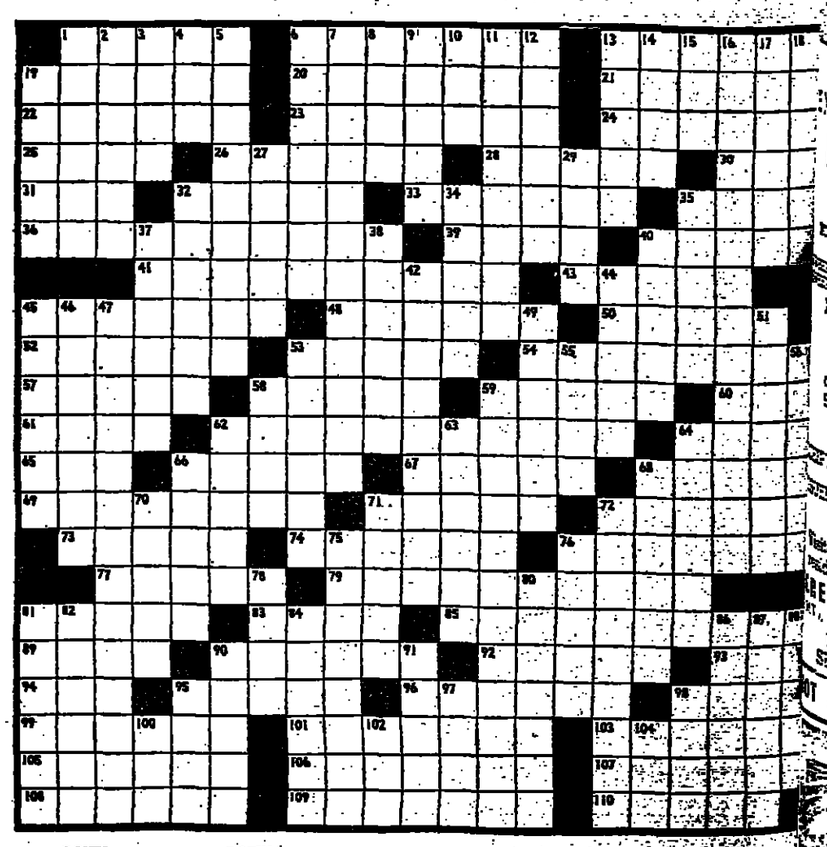

Julian Moynahan is a memb of the Rutgers University Engli Department. His third nov "Garden State," is soon to published.

Crampton Is Sharing Golf Lead

Shoots a 67 in San Diego Open

SAN DIEGO, Feb. 16 (UPI).—Bruce Crampton, seeking his third title of the year, shot a five-under-par 67 yesterday to tie Tom Kite and Hale Irwin for the first-round lead in the $170,000 Andy Williams-San Diego Open.

Crampton, who won the Phoenix and Tucson Opens on consecutive weekends, had six birdies and one bogey on his card of 33-34.

Kite, a 23-year-old former collegiate champion, matched Crampton with six birdies and a bogey for his 34-33. Irwin had seven birds and two bogeys on his card of 32-35.

Rain, hail, thunder and lightning delayed play for three hours in the morning.

Because of the weather all three leaders played the 6,667-yard north course at Torrey Pines Golf Course, which was not scheduled to be used in this 72-hole tournament.

The players were not happy about it. The greens had not been mowed, they said, but they will be for the group that plays there today.

FIRST-ROUND LEADERS

Hale Irwin	32-35—67
Bruce Crampton	33-34—67
Tom Kite	34-33—67
Doug Sanders	34-34—68
Frank Beard	34-34—68
Mike Reasor	35-34—69
Billy Casper	35-34—69
Grier Jones	35-34—69
Rick Massengale	34-35—69
Steve Melnyk	35-34—69
Mike Morley	34-35—69
Bob Dickson	34-35—69

United Press International.

THAT HEMMED-IN FEELING—Chris Ford of the Detroit Pistons of the National Basketball Association looks for help as Mike Price of the Philadelphia 76ers moves in.

Bullets Beat Warriors, 96-94, Behind Chenier and Unseld

OAKLAND, Calif., Feb. 16 (UPI).—Guard Phil Chenier had 13 points in the fourth quarter and center Wes Unseld scored with 23 seconds remaining to give the Baltimore Bullets a 96-94 victory in the National Basketball Association over the Golden State Warriors last night.

Unseld's short jumper gave the Bullets a 95-92 edge before Warrior guard Jim Barnett drove in for a basket with 13 seconds remaining.

Baltimore did not get a free throw until the third period, but was hot enough from the field to stay close.

Cougars 120, Colonels 108

In the American Basketball Association, Gene Little and Mack Calvin combined for 22 points in the last quarter as Carolina beat Kentucky, 120-108. Trailing throughout the game, the Cougars went into the final quarter down four points, 83-79, then outscored the Colonels, 41-25, in the final period.

NBA Result

Thursday's Game

Baltimore 96, Golden State 94 (Chenier 26, Clark 20; Mullins 30, Barry 19).

ABA Result

Thursday's Game

Carolina 120, Kentucky 108 (Cunningham 28, Owens 22; Issel 26, Ladner 30).

Springbok Opposition

WELLINGTON, N.Z., Feb. 16 (UPI).—Prime Minister Norman Kirk said today that he would try to persuade New Zealand rugby unions to cancel a proposed tour here by the South African Springbok rugby team because of apartheid in South Africa.

Fordham Topples Irish, 70-69

Ruins Return of Former Coach

NEW YORK, Feb. 16 (UPI).—The Fordham Rams buried "the Digger" last night.

Dick "Digger" Phelps, a subject of much controversy in New York when he left Fordham two years ago to take the basketball head coaching job at Notre Dame, brought his team into Madison Square Garden last night to meet his former club and had a rude homecoming.

Fordham, losers of six in a row, upset the Irish, 70-69, on a jump shot by sophomore Darryl Brown with 12 seconds remaining. The defeat left Notre Dame with an 11-10 mark while Fordham is 12-10.

"It's the greatest win I've ever had in coaching," said Hal Wissel, who succeeded Phelps at Fordham. "I compare this to the day I got married and the day my children were born."

Jeers and Catcalls

Phelps, who left Fordham with four years remaining on a five-year contract, was greeted by catcalls from most of the 10,036 fans before the game. He refused to comment on his relationship with Fordham.

In other college basketball action, Long Beach State avenged an earlier loss to San Jose State, 117-75. Houston downed Corpus Christi, 82-70. Memphis State routed Wichita State, 99-77. Brigham Young beat Texas-El Paso, 48-43, and Louisville topped Drake, 80-77.

Long Beach State, which lost its only game of the season at San Jose last month, got 24 points from Roscoe Poindexter and 16 rebounds from Ed Ratleff to defeat San Jose and raise its record to 20-1.

Dwight Jones scored 11 points, grabbed 16 rebounds and added five assists to lead Houston to its 11th successive victory. The Cougars, now 18-2, blew the game open in the second half by outscoring Corpus Christi, 20-10, in a seven-minute stretch.

Sabres Defeat The Rangers, 4-1, Take 4th Place

BUFFALO, N.Y., Feb. 16 (UPI).—First-period goals by Rene Robert and Gil Perreault led the Buffalo Sabres to a 4-1 victory last night over the New York Rangers, moving the Sabres back into sole possession of fourth place in the National Hockey League's East Division.

Bruins 3, Flyers 1

Bobby Orr scored a goal and had two assists as Boston defeated Philadelphia, 3-1.

NHL Results

Thursday's Games

Boston 3, Philadelphia 1 (Orr, Hodge, Sheppard; Dornhoefer).
Buffalo 4, New York Rangers 1 (Robert, Perreault, Mickey, Gratton; Ratelle).

WHA Results

Thursday's Games

Houston 5, Albert 3 (Taylor 2, McDonald, Labossiere, Hughes; Hicke, Falkenburg, Patenaude).
Winnipeg 7, Chicago 2 (Hull 4, Cuddie, Beaudin 2; Morris 2).
New England 6, Los Angeles 5 (Plean, Sheehy 2, Earl, French, Cuniff; Veneruzzo, White, Leblanc, Sutherland, McCaskill).

Riessen and Taylor Reach Tennis Final

COPENHAGEN, Feb. 16 (UPI).—First-seeded Marty Riessen defeated Ken Rosewall, 6-4, 3-6, 6-4, tonight to reach the finals in the World Championship Tennis indoor tournament here.

Riessen will meet Roger Taylor in tomorrow's final. Earlier tonight, Taylor defeated third-seeded Brian Fairlie, 6-4, 6-4.

Once Is Once Too Often for This Wrestler

THOUSAND OAKS, Calif., Feb. 16 (UPI).—Kathy King went back to cheerleading today after an intercollegiate wrestling career that lasted 10 seconds.

That's how long the 21-year-old coed at California Lutheran College took to decide that her male opponent in the 155-pound class last night meant business.

She defaulted and Southern California College of Costa Mesa went on to defeat Cal Lutheran, 25-23.

"I'm so disappointed," she said. "I was really ready. I had a wig on and I cut my fingernails off. I was all psyched up."

But then she decided that she didn't really want to wrestle Taylor Peryer, who has lost only one match all season.

"At first, she psyched me out," he said. "I wondered if she knew karate or something. But I was gonna go out there and get her, just like she was a guy. I was going to grab her by the head and do my specialty. It's called the Swedish headlock."

Miss King, who normally is a cheerleader for Cal Lutheran, suited up for the match only because the team's regular 155-pounder was sidelined with a knee injury.

"Sure it's a gimmick," admitted Cal Lutheran's coach, Ted Eckman. "We were hoping they wouldn't wrestle and we would get six points by default.

"But she was legal," he said. "I had the referee check it out before the match and I'm a member of the NAIA wrestling rules committee and I know its legal."

Southern California's coach, Jack Robinson, said he planned to protest because Miss King had not stripped and weighed in.

"I didn't have to," she said. "They just took one look at me and knew I was well under 155."

Annapolis Quarterback in 1950s

Navy Appoints Welsh as Its Football Coach

By Leonard Shapiro

ANNAPOLIS, Md., Feb. 16 (WP).—George Welsh left State College, Pa., yesterday to come here and accept the head football coaching position at the Naval Academy.

"I have no predictions, no goals to set, but I've never been associated with a losing squad yet and I don't intend to start now," Welsh said. "I expect to have a winner this year."

An assistant at Penn State the last 10 years and a Navy quarterback in the 1950s, Welsh was selected from more than 250 applicants after Rick Forzano resigned Feb. 1 to accept an assistant's post with the Detroit Lions.

The terms of Welsh's contract were not revealed. Forzano had been operating on a two-year pact at $25,000 a year.

Work and Practice

Discussing his team's prospects, Welsh said: "If you work hard, do the best you can and practice hard during the week, Saturdays will take care of themselves."

Even against Notre Dame, Michigan and Penn State—all Navy opponents next season?

"I've looked at the schedule and we'll take them one at a time," he said. "Seriously, I don't see any reason we can't compete with those schools. I'm not saying we'll win them all. I'm not making predictions. I just feel we can have a winning season.

"One of the things we have going for us is the ability to recruit nationwide. We should be able to throw the net out a little wider. What kind of players do we want? Big, and fast, and tough."

Navy's athletic director, J. O. Coppedge, indicated that the decisive factors in hiring Welsh included "his familiarity with the academy, the fact that he is a fine gentleman and he is a proven winner."

Later, Welsh was asked to pose for photographers with his old Navy uniform, No. 11.

"Haven't they retired this yet?" he asked.

As a 162-pound junior, Welsh led the 1954 Navy team to a 27-20 upset of Army and a 21-0 victory over Mississippi in the Sugar Bowl.

Sports Shorts

Steve Carlton, baseball's winningest pitcher in 1972, has won the $15,000 Hickok Award as "professional athlete of the year" by 22 points over golf star Jack Nicklaus. Carlton won 27 games (tying Sandy Koufax's record for most victories by a left-hander) and lost 10 for the Philadelphia Phillies, who won only 59 games all season. He led the National League in earned run average with 1.98 and in shutouts with eight, walked only 87 in 346 innings, and was the unanimous choice for the Cy Young Award as the league's best pitcher. In the Hickok balloting, Carlton, named first by 81 voters, had 349 points compared to 327 for Nicklaus, who was placed first on 67 ballots. Wilt Chamberlain was third with 67 points and Larry Brown fourth with 66 1/2. The 1971 winner was golfer Lee Trevino.

●

Center Kareem Abdul-Jabbar of the Milwaukee Bucks sprained a hip joint in an NBA game at Philadelphia and will be out of the lineup for an indefinite period. Abdul-Jabbar was hurt when, driving for a layup, he collided with another player and fell. After sinking two free throws, he left the game with muscle spasms in his lower back.

●

After the cancellation of a testimonial dinner in the United States for Charlie Brown, friends of the amateur baseball player and manager decided to honor him in Paris. Organizers of the dinner said they hoped to erase the cruelty shown the athlete at home. Former baseball star Joe Shlabotnik is expected to be the featured speaker.

●

Is hearing a prerequisite for playing football? Not for Bonnie Sloan, who is deaf and speaks in murmurs. Sloan, from Austin Peay State University in Tennessee, was selected on the 10th round of the recent draft by the St. Louis Cardinals. He is a 260-pound defensive tackle who has never been able to hear. But he reads lips, which is how he receives defensive signals. "Bonnie has amazing retention," said his college coach, Ray Thomas. "Once you teach him something, he never forgets it."

●

Steve Sloan, 28, an assistant football coach at Georgia Tech, has become the head coach at Vanderbilt, the youngest in the Southeastern Conference. Sloan, who was quarterback for Alabama's 1965 national football championship team, accepted a five-year contract with Vanderbilt. Salary terms were not disclosed but officials said he would be paid about $30,000 a year.

Some You Lose, Some You Win

FRIENDSVILLE, Tenn., Feb. 16 (AP).—Friendsville Academy ended its 138-game losing streak in high school basketball yesterday, defeating St. Camillus Academy of Kentucky 62-43.

It was the first victory for the 55-student Friendsville Academy in six years. For the Kentucky team, it was the 49th loss in a row.

The game ended with a mob scene at the gym as the Friendsville players lifted coach Rick Little to their shoulders and carried him across the floor.

The Scoreboard

TENNIS—In Calgary, Alberta, third-seeded Jergin Fassbender outlasted Petr Szoke, 6-7, 6-2, 6-4, to enter the third round of the Canadian National indoor tennis championships. Ion Tiriac also entered the third round by eliminating Tony Bardsley, 7-5, 7-6. Mike Belkin, 6-3, 6-1 and Pat Cramer, defeated John Cooper, 7-5, 6-2. In the first round of doubles, Juan Gisbert and Ion Tiriac, defeated Tony Bardsley and Hans Kary, 6-4, 7-5.

In Toronto, unseeded Jaime Pillol defeated sixth-seeded John Alexander, 6-3, 6-7, 6-4 in the Toronto international tennis tournament. Dick Stockton defeated Jim McManus, 6-2, 6-4 top-seeded Rod Laver and eighth-seeded Cliff Richey advanced to the semi-finals. Laver defeated Frew McMillan, 6-2, 6-3, while Richey defeated Nikki Pilic, 6-4, 7-6.

GOLF—In Panama, Vicente Fernandez took a one-stroke lead in the opening round of the Panama Open with a five-under-par 67 that featured five birdies. Four other professionals were bunched behind Fernandez with 68s. They were Roberto de Vicenzo, Peter Oosterhuis, Peter Townsend and Gene Borek.

WATER POLO—In Cupertino, Calif., Anatoli Akimov scored four goals for the Soviet Union in a 10-6 victory over San Jose State University. The Soviet team is 4-0 on its U.S. tour.

BOXING—In San Juan, Puerto Rico, Antonio (Kid Pambele) Cervantes retained his world Boxing Association junior welterweight title, with a split decision over Jose Marquez of Puerto Rico. Pambele, a Colombian who fights out of Caracas, Venezuela, dropped Marquez, for the mandatory eight-count in the 15th round for the only knockdown.

ALPINE SKIING—At Garmisch-Partenkirchen, West Germany, Bernadette Zurbriggen of Switzerland won the European Cup giant slalom. Martine Couttet of France, who leads in the European Cup series, finished ninth. Rost Mittermaier, West Germany, was second.

Monza Crash Kills British Race Driver

MONZA, Italy, Feb. 16 (UPI).—William David Bartropp, a British racing driver, was killed in a crash during an endurance test at Monza Autodrome today.

Track officials said Bartropp, 30, lost control of his Ford Escort when it emerged from a curve, and it overturned.

Bartropp was one of four drivers who had been alternating at the wheels of two cars since Feb. 1. The goal was to keep both cars running nonstop for one month.

Art Buchwald

The New SST

WASHINGTON—The fate of the Anglo-French Concorde SST appears very grim. Most airlines, with the exception of BOAC and Air France, have dropped their options on the supersonic plane, and this could strain relations between the French and British who have poured billions of dollars into the project.

Buchwald

A summit meeting between the two countries was held in London last week to discuss the problem.

Pierre LaFrance, speaking for the French, said, "Messieurs, we are in serious trouble. No one will buy the Concorde."

Sir Reginald Bottomly, spokesman for the British, said, "Well, let's all have a cup of tea."

"Zut, alors," *said* LaFrance, "this is no time to drink tea. The situation is desperate. I propose we have a glass of Cognac."

"Tea," said Bottomly.

"Cognac," said LaFrance.

* * *

One of the British delegates said, "Gentlemen, let us get on with the meeting. I think we should look on the brighter side of things. After all, BOAC and Air France have ordered the Concorde."

"That is correct," said another French delegate. "And now it will take only three minutes for an Air France plane to fly from Paris to London."

"Now wait a minute," Bottomly said. "*I might remind you* that it will take only three minutes for a BOAC plane to fly from London to Paris. If we're going to prove that this plane is profitable, we should have only *one* airline fly the London-Paris and Paris-London routes."

"*Exactement*," said LaFrance. "Therefore, it should be Air France."

"BOAC," said Bottomly.

"Air France is noted for its food. We can serve a better dinner."

"In three minutes?" Bottomly asked.

* * *

"Gentlemen," said one of the British delegates, "I don't believe getting from London to Paris in three minutes will impress the other airlines. We must do something more dramatic. It seems to me that the main issues, besides the unprofitable load factor, are the noise as well as the breaking of the sound barrier. These are ecological problems that must be overcome before we can sell the Concorde. If we solve these, we will sell our plane to every airline in the world."

"That is brilliant," LaFrance said. "We need English partners to tell us this."

"Wait. I'm sure I did not raise the issues without a solution," *the British delegate said.* "What I suggest we do is make a much larger airplane, twice the size of the Concorde."

"It's impossible," LaFrance said. "You cannot have a supersonic plane twice as large as the Concorde."

"*You can," said Bottomly,* "if you cut down the speed of the plane to 600 miles per hour."

* * *

"But that is not supersonic," a French delegate protested.

"Quite," said Bottomly. "Therefore there won't be any *complaints about the sonic boom.*"

"Magnifique," the French delegate said. "We could have an upstairs bar on the plane."

"And a piano in the tourist lounge."

The British delegation unrolled a large blueprint. "By slowing down the plane to 600 miles per hour and doubling the passenger capacity, your fuel costs can be cut in half."

The French delegation studied the plans. LaFrance said, "I think we have solved our problem. We shall give orders to build a prototype immediately. What shall we call the plane?"

Bottomly said, "We need something that will fire up the public's imagination. Our people suggest we call it the Concorde 747 1/2."

LaFrance jumped with joy. "We *have made aviation history!*"

Visiting Britain

LONDON, Feb. 16 (UPI).—Foreign visitors to Britain during 1972, excluding Commonwealth citizens and those from the Irish Republic, *totalled* 5,375,000, an increase of approximately 8 percent over 1971, the Department of Trade and Industry and the British Tourist Authority *said* Wedensday.

Mary Blume

The World of Ronald Searle

© 1972, Claudia Descloseau.

PARIS (IHT).—The Bibliothèque Nationale is a highly evitable spot of daunting earnestness except, temporarily, for one *wing filled with people smiling*, laughing and barely resisting the temptation to poke each other in the ribs in sheer delight. The occasion is a show of 250 works by the graphic artist Ronald Searle.

The last English artist whose *works hung in the Bibliothèque's* Cabinet des Estampes was William Blake in the early 19th century. Mr. Searle, suitably moved by the invitation, has tried to respond with a solemnity worthy of the place. A feature of Bibliothèque Nationale shows is a *showcase full of piously preserved* and breathtakingly irrelevant memorabilia—"Baudelaire's walking stick," as Mr. Searle summarizes.

His own showcase of memorabilia includes a horoscope passed out by a deaf mute who works *the Paris restaurants* ("You are eaten by unrest and teased by ambition; a rather complex case"), Mrs. Searle's Minnie Mouse doll, a certificate from St. Andrew the Less parish stating that Ronald Searle won a prettiest baby prize on June 17, 1920, and *a reservation for a table at* the Coupole to celebrate the arrival of an unexpected check, June 26, 1970.

The objects were carefully labelled by the Bibliothèque Nationale's offical labeler, who goes on next to label a Copernicus showcase (Copernicus's walking stick?).

The show features works from 1961, when Ronald Searle moved to Paris, to today (the most recent drawing is this month's New Yorker cover). Although none of his work for films or theater is included, Mr. Searle says it is the most representative *of his more than 50* one-man shows:

"Perhaps instead of the man who draws cats or snails it shows the man who progresses," he says. Mr. Searle is quiet and kind, a terrific worker who likes to unwind at day's end with his wife, Monica, and a glass of champagne served in charming antique glasses on which the words "souvenir de mes noces" are incised. This disturbs Mr. Searle: "Shouldn't it be *our* wedding? Such egotistical glasses, it reminds me of towels that say His and Mine."

In the years covered by the show the drawings seem to get lighter and gayer, with a line that soars, swerves and then comes home to score a telling point.

"You learn as you go on to conceal the difficulties, like an actor learning to throw away a line. *You have to keep surprising* yourself, I push as hard as I can every time."

The drawings show sympathy with all forms of life, from a tired Hamburg hooker to a beaver curling himself into an inaccurate semblance of a beaver hat. There *are dreams,* nightmares, *memorable* fancies and incidents of poetic justice such as the natty jack-rabbit handing a sawbuck to a Bunny girl or—less poetic but even juster—a pig sleeping soundly while in a corner on the butcher's rack hangs a haunch *of man.*

A snail has "Defense d'Afficher Loi du 29 Juillet 1881" prudently inscribed on its shell; in a "Homage to Mickey Mouse" the hero, wizened but still sprightly, stands on the mile-high pedestal he deserves. The commercial *assignments transcend their nature*: a pink snake, for Philadelphia, smugly coils itself into the word Zoo, and for a Holiday article on Ireland, writer S. J. Perelman, on a horse-drawn cart, rides with an expression of brave disquiet into a Celtic Twilight of positively vast proportions.

Although he is in the great English line of Hogarth, Gillray and Rowlandson, Ronald Searle says that these days there's nothing in England. "And in America there's nothing much new except Crumb, who's a sort *of satire against satire.*" For Ronald Searle, France is the place:

"Here one is surrounded by the most perceptive and poetic lot of all. These boys are in opposition, not so much politically but against the 19th-century attitude of the French. They're trying to drag France into the 20th century. And they're getting confidence—gradually they're beginning to discover they're being listened to."

Ronald Searle accepts, though with some boredom, the black humor label so often pinned on him ("Black humor in a sense is reality—if you think about what goes on today, what could be more black or more humorous?"), but the words "cruel" and "bitter" have also been used. "I see a critic says you are cruel," said Mr. Searle's florist, Mr. Beaufrère. "For me this is false." It is indeed.

Searle is extremely critical: "This terrible theater that goes on around us repulses me, the lack of sensitivity. Perhaps I'm a little oversensitive to what people go through, I get terribly affected by it. I can't be cold; I try to, I can't."

In the show is a brilliant series of Hamburg's red light district, which upset Mr. Searle terribly. He got out as quick as he could, and drew furiously: "I gathered the material and digested it afterwards because I couldn't stand it as it was."

Also in the show—out of the chronology and included despite Searle's reluctance—is a showcase of the secret drawings he did as a very young prisoner of the *Japanese for four years during* World War II. The titles include "Malnutrition, Changi Gaol, Singapore, 3 Aug. 1945," "Jap Field Officer," "Cholera Lines," "Our Guard Asleep." The drawings are remarkable for the cool urgency, their lack of embellishment. They were obviously intended as witnesses to a horror too enormous to exaggerate or, unfortunately, to forget.

"I'm sharp because line is sharp," Ronald Searle says, "but not cruel. I'm a pacific person." He smiles very gently. "I know what cruelty is."

Ronald Searle's clown, for the 14th Circus Gala, Paris, 1971.

PEOPLE: *'New Centurions' Author Back on His Old Beat*

Joseph Wambaugh, author of "The New Centurions" and "The Blue Knight," is back as a detective with *the Los Angeles Police* Department. Wambaugh, whose best-selling books are about policemen at work, *said he had* earned enough money to live at ease, "but I was tired of sitting around my big, expensive living room. My new Cadillac bored me. And I didn't know what the hell was right or wrong."

* * *

Olympic swimming champion Mark Spitz won't be giving out an Oscar at Academy Award presentations, as planned, on March 27. An academy spokesman said that Spitz felt the honor "should be reserved for those who have contributed something to motion pictures."

* * *

Liza Minnelli is the 23d Hasty Pudding woman of the year. The group claims to be the oldest theatrical organization in the United States. She'll be in Cambridge, Mass., Tuesday to receive the award and help Hasty Pudding kick off its 125th annual production, "Betwitched Bayou." Other women of the year awards have gone to Gertrude Lawrence, Katharine Hepburn, Ethel Merman, Rosalind Russell, Lauren Bacall and Shirley MacLaine.

* * *

MORE ON "TANGO": A Bologna court ruled Thursday that "The Last Tango in Paris" can go back on show in Italy immediately. Justice officials had refused to give the film back to the distributors pending an appeal against the decision on Feb. 2 by three judges that it was not obscene but a work of art. In London, British film censor Stephen Murphy ordered a 10-second cut, *before permitting the film to* be shown. The distributors and director Bernardo Bertolucci agreed to chop out the *offending* sequence. It is in what a United Artists spokesman called "the butter sequence."

* * *

British pop singer Tom Jones is in Japan for a concert tour. Jones had said he'd cancel the tour because tickets were reportedly being sold at exorbitant prices. But he agreed to go through with it when the Japanese promoter promised that £6,250 of the proceeds would be donated to Japanese welfare activities.

* * *

Daniel Daly took his wife to the *movies once.* That was 21 years ago. He took her on vacation once, too—to visit relatives. In 32 years of marriage, he never called *her* "dear" *or* "darling"—or even by her first name. Mrs. Daly, as her husband always called her, got a divorce Thursday in London on the grounds of her husband's "unreasonable behavior." She is 68, he, 69.

* * *

South African singer Miriam Makeba will produce her next record album herself in an effort to break what she calls a boycott imposed on her in the United States because *of her marriage to* Stokely Carmichael. "When I married my beloved husband," she told a group of friends, diplomats and reporters in New York, "some people took my marriage very personally. They cancelled my appearances and didn't play my records. It *didn't matter* because we had planned to live in Guinea anyway." The Carmichaels went to Guinea in 1969 but returned to live in the United States last year. She paid all costs for her new album herself and is now looking for a distributor. Wednesday she gave her first American concert in three years at New York's Philharmonic Hall.

* * *

Actor Edward G. Robinson, who died Jan. 26, left an estate of more than $3.25 million. In his will, *he ordered that his art* collection of 88 works, including paintings by Renoir, Picasso, Monet and Degas, be sold and suggested it be auctioned in London. The actor left lifetime trusts for his widow, his son actor Edward Robinson Jr. and his *granddaughter Francesca Robinson.*

* * *

A small boy, his head swathed in a fuzzy wool kerchief, sat beside his mother on a crowded Russian bus. "Mommy, mommy, tell me, do I look like a cosmonaut?" he asked over and over again. "Leave me alone," his mother snapped. "You're a little fool, not a cosmonaut." Overhearing the exchange, a woman snapped back. "Why do you speak like that to the child? He hasn't done anything." The mother took the kerchief off her son's head. He was wearing an aluminum saucepan. "We're on our way to the third clinic," the exasperated *mother muttered.* "The first two couldn't get it off."

—SAMUEL JUSTICE.
